

Alphinity Australian Share Fund

The Alphinity Australian Share Fund is a well-diversified portfolio of Australian stocks listed on the ASX.

Why choose this fund?

The Fund is designed to sit as a core position in an equities portfolio. It aims to meet its investment objectives in a risk-controlled manner and has a suggested time horizon of at least five years.

Key features of the Fund:

- Aims to deliver consistent incremental outperformance at comfortable levels of volatility.
- Quality large-cap exposure to the Australian share market.
- Core style with a growth bias, however the approach has proven successful through a number of different market cycles.
- Alpha delivered from stock selection with minimal sector biases.
- The combination of fundamental and quantitative research results in a strong buy and sell discipline.

How does the Fund work?

Investment philosophy

We believe that a company's current and expected earnings growth ultimately drives its share price performance. Research has shown there is a systematic mispricing of individual equities over the short to medium term – due to under, or over, estimation of a company's earnings ability.

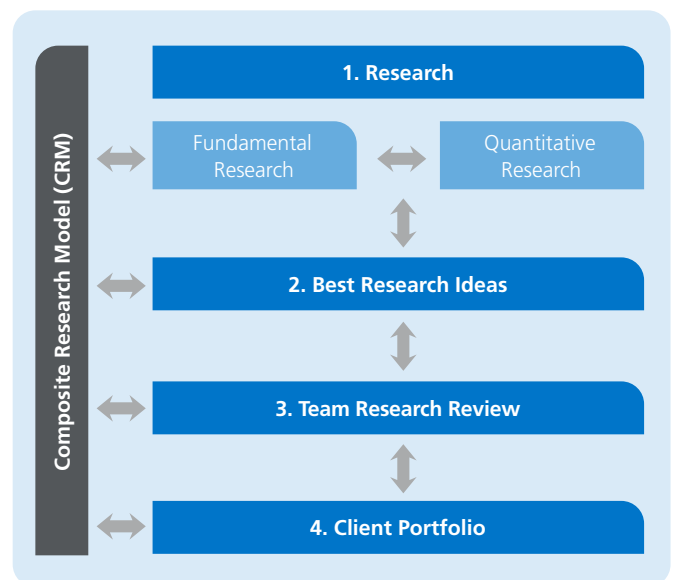

This provides an opportunity for increased investment returns once the true earnings path of a company becomes apparent to the market.

Investment approach

The Alphinity Investment Management (Alphinity) investment approach is based on a combination of strong fundamental bottom-up research and targeted quantitative inputs. The goal is to identify companies that are likely to deliver earnings in excess of that expected by the market. We look for quality, undervalued companies in – or about to enter – an earnings upgrade cycle, as research has proven these companies will outperform over time.

Research is brought together by a proprietary in-house investment tool, the Composite Research Model (CRM). The CRM allows the team to objectively compare companies across, and within sectors, helping to construct efficient portfolios with the information available. Importantly, it provides our team with strong 'buy' and 'sell' signals.

Portfolio construction

Step 1: In-depth multi-discipline approach

The fundamental research (in the form of total expected return) and quantitative indicators are combined into a Composite Research Model (CRM) that scores the relative merits of stocks.

Step 2: Best research Ideas

The best research ideas are those which have a high relative CRM score (or low score for sell ideas) and are backed by the analyst's strong fundamental conviction.

Step 3: Rigorous team review

The best ideas (buy and sell) are rigorously reviewed by the team on a formal and continual basis, drawing on the fundamental and quantitative insights, and vetting those inputs.

Step 4: Portfolio construction

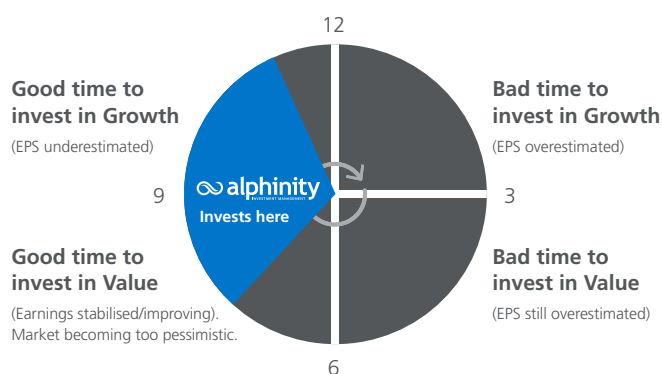

Stocks with the highest CRM score and highest team advocacy post review, make up the biggest positions in the portfolio.

The outcome

The result is a portfolio of undervalued quality companies, with positive earnings momentum, constructed in a disciplined risk aware framework.

Invariably our portfolio tends towards core with a growth bias, however our approach has proven successful though a number of different market cycles.

The following chart indicates our preferred time to invest in a company's earnings life cycle (regardless of earnings growth rate).

About Alphinity

Alphinity is an equity investment manager with around A\$10 billion funds under management (as at December 2019). We invest in companies with underestimated forward earnings expectations which we identify using a combination of fundamental analysis and select quantitative inputs.

Alphinity's structure ensures a clear alignment of interests with our clients to deliver consistent outperformance over time. It has:

- A clear and proven investment philosophy.
- A unique, disciplined and rigorous investment process.
- A highly experienced, cohesive and accomplished investment team.

Alphinity utilises the expertise of Fidante Partners' administration and distribution services. Fidante was responsible for more than A\$62 billion funds under management as at December 2019.
