

Ox Capital Dynamic Emerging Markets Fund

Product Disclosure Document

23 November 2023

Ox Capital Dynamic Emerging Markets Fund

ARSN 649 969 264

APIR HOW6479AU

Responsible Entity

Fidante Partners Limited

ABN 94 002 835 592

AFSL 234668

About this Product Disclosure Statement (PDS)

This product disclosure statement dated 23 November 2023 provides information to help investors and their advisers assess the merits of investing in the Class A class of units in the Ox Capital Dynamic Emerging Markets Fund (ARSN 649 969 264) (**Fund**). References in this PDS to the **Ox Capital Dynamic Emerging Markets Fund** or the **Fund** are to the Class A units in the Ox Capital Dynamic Emerging Markets Fund. No other class of units in the Ox Capital Dynamic Emerging Markets Fund is offered in this PDS. You should read this document in full before making an investment decision about the Fund. In addition you should also read the Target Market Determination (**TMD**) in conjunction with the PDS to ensure investment in this Fund aligns with your objectives, financial situation and needs. The information provided in this PDS is general information only and does not take account of your personal financial situation or needs. You should obtain financial advice tailored to your own personal circumstances before investing in the Fund.

In preparing this PDS we did not take into account your particular investment objectives, financial circumstances or needs. As investors' needs and aspirations differ, you should consider whether investing in the Fund is appropriate for you in light of your particular objectives, financial circumstances or needs. You should also obtain independent advice before investing in the Fund, particularly about matters such as taxation, retirement planning and investment risk tolerance.

Important notices

Fidante Partners Limited (ABN 94 002 835 592, AFSL 234668) (**Fidante, we, our, us, Responsible Entity**) is the responsible entity of the Fund and issuer of this PDS. Our ultimate parent is Challenger Limited (ABN 85 106 842 371). Fidante is a member of the Challenger Limited group of companies (**Challenger Group**). Fidante is not an authorised deposit-taking institution (**ADI**) for the purpose of the Banking Act 1959 (Cth), and its obligations do not represent deposits or liabilities of an ADI in the Challenger Group (**Challenger ADI**) and no Challenger ADI provides a guarantee or otherwise provides assurance in respect of the obligations of Fidante. Investments in the Fund are subject to investment risk, including possible delays in repayment and loss of income or principal invested. Accordingly, the performance, the repayment of capital or any particular rate of return on your investments are not guaranteed by any member of the Challenger Group.

Fidante authorises the use of this PDS as disclosure to investors and potential investors who wish to access the Fund directly (**Direct Investors**), and through platforms that are an investor directed portfolio service (**IDPS**) or IDPS like scheme (**Indirect Investors**). Please refer to 'Indirect investors' in the "Additional information" section.

By investing in the Fund, you confirm that you have received a copy of the current PDS and TMD to which this investment relates, that you have read both documents and agree to the terms contained in them, and that you agree to be bound by the terms of the current PDS, TMD and the current Constitution (each as amended from time to time).

The offer or invitation to subscribe for units in the Fund under this PDS is only available to persons receiving this PDS in Australia or New Zealand and is subject to the terms and conditions described in this PDS. The information in this PDS is of a general nature and is based on our understanding of the Australian tax laws, as at the date of this document, as they relate to Australian resident individual taxpayers who hold their investment on capital account and does not take into account the tax treatment of New Zealand resident taxpayers.

We have appointed Ox Capital Management Pty Ltd (ABN 60 648 887 914, AFSL 533828) (**Ox Capital**, or the **investment manager**) as the investment manager of the Fund.

Target Market Determination

The Target Market Determination (**TMD**) describes the type of customers who the product is likely to be appropriate for. It also specifies distribution conditions and restrictions that will help ensure the Fund is likely to reach customers in the target market. Each person should obtain and consider the Fund's TMD and this PDS before making a decision about whether to acquire or continue to hold the Fund to ensure this Fund aligns with your objectives, financial situation and needs.

Updated information

The information in this PDS is up-to-date at the time of preparation. However, some information can change from time to time. If a change is considered materially adverse we will issue a supplementary PDS or a replacement PDS. For updated or other information about the Fund (such as a copy of the PDS, TMD or other information such as performance) that is not considered materially adverse, please contact your financial adviser, call the Fidante Investor Services Team on 1300 721 637 or visit our website www.fidante.com. We will send you a copy of the updated information free of charge upon request.

Consents: Ox Capital has provided consent to the statements about it in the form and context in which they are included. Ox Capital was not otherwise involved in the preparation and distribution of this PDS and is not responsible for the issue of this PDS, nor is it responsible for any particular part of this PDS other than those parts that refer to it. Ox Capital has not withdrawn its consent before the date of this PDS.

About Ox Capital

Ox Capital is a Sydney based boutique emerging markets investment manager majority owned by its founding principals and portfolio managers.

Ox Capital aims to deliver consistent outperformance for its clients by investing in high quality, undervalued, well-run companies that are leveraged to long-term structural growth trends in Asia ex-Japan and emerging markets. Its process for identifying such companies includes a distinctive combination of rigorous bottom up research overlaid with proprietary top-down macro quantitative models that help guide country and sector asset allocation and control risk.

About the Responsible Entity

Fidante is the Responsible Entity of the Fund. As Responsible Entity of the Fund, we issue units in the Fund and are legally responsible to the unitholders of the Fund for its operation.

Fidante is one of Australia's largest active investors, offering compelling strategies across equities, fixed income, and alternative assets, via partnerships with leading investment teams. We have appointed Ox Capital as the investment manager of the Fund under an investment management agreement. In addition to operating the Fund, we provide back office, marketing, distribution, administration, and compliance support services to Ox Capital, allowing Ox Capital the freedom to focus on investing.

A related entity of Fidante has a partial equity stake in Ox Capital. Neither we, nor any of our related entities, nor Ox Capital guarantee the repayment of your capital or the performance of your investment or any particular taxation consequences of investing.

Significant features and benefits of the Fund

- **Concentrated:** A portfolio of 30-50 high quality, undervalued, well run companies that have the potential to generate high absolute returns over the medium to long term.
- **Capture growth:** Ox Capital's investment approach is to identify the immense positive changes taking place in Asia and other key emerging markets and to find companies that can benefit from those trends.
- **Macro overlay:** A quantitative model provides a bird's eye view of how macro conditions impact equity markets and helps guide country and sector asset allocation.
- **Capital protection strategies:** The Fund can use derivatives such as index futures and equity swaps to help protect the portfolio from market volatility and to obtain synthetic exposure to stocks or markets.
- **Experienced team:** A team of experienced and passionate emerging market investors strongly aligned with clients' investment objectives.

Features at a glance

		Refer to Section
Minimum transaction requirements¹		'Making, withdrawing and monitoring your investment'
Initial investment	\$10,000 or \$1,000 when a Regular Investment Plan is established.	
Additional investment	No minimum.	
Minimum withdrawal	No minimum.	
Minimum balance	No minimum.	
Indirect Investors	If you are an Indirect Investor, you need to comply with any minimum transaction and balance requirements of your platform operator.	
Fees and costs		'Fees and other costs'
Management fees and costs	The management fees and costs of the Fund are 1.00% p.a. of the net asset value of the Fund.	
Performance fee	The performance fee is calculated as 15% of the Fund's daily return (after fees and expenses and after adding back any distributions paid) above the Fund's Performance Benchmark.	
Buy/sell spread	+0.25% / -0.25% of the investment and withdrawal amount.	
Risks of investing in the Fund	A degree of risk applies to all types of investments, including investments in the Fund. The significant risks are described in 'Risks of investing in managed investment schemes'.	'Risks of investing in managed investment schemes'
Making and withdrawing your investment		'Making, withdrawing and monitoring your investment'
Investment and withdrawing	Generally, you can invest or withdraw at any time subject to certain limits in the Constitution and this PDS.	
Transaction cut-off times	Valid transaction requests must be received by us prior to 3:00pm Sydney time to be processed that day and withdrawal requests will usually be paid within five business days.	
Distribution payments		'Additional information'
Frequency	The Fund generally pays distributions annually; however, there may be periods in which reduced or no distributions are paid and we do not guarantee any level of distributions.	
Payment methods	Reinvested into the Fund as additional units or paid to your nominated account. For Indirect Investors, distributions will be paid to your platform operator as soon as practicable after the end of the distribution period.	
Valuations and pricing		'Additional information'
Valuing the Fund's assets	The Fund's assets are usually valued each NSW business day.	
Unit pricing	Unit prices are usually calculated each NSW business day.	
Investor reporting		'Making, withdrawing and monitoring your investment'
Transaction confirmations	We generally send transaction confirmations for investments and withdrawals.	
Regular reporting	We send quarterly periodic statements with details of transactions and fees paid.	
Annual tax reporting	We send an annual tax statement.	

ASIC Benchmarks and Disclosure Principles

ASIC has developed two benchmarks and nine disclosure principles for funds that meet ASIC's definition of a hedge fund. These benchmarks and disclosure principles are aimed at assisting investors to understand the risks and features of these funds and whether such investments are suitable to them. The benchmarks deal with the valuation of assets and periodic reporting policy of the Fund, while the disclosure principles provide information on the Fund's investment strategy, investment manager and structure as well as further detail on the Fund's use of derivatives, leverage, short selling and the risks to withdrawals and liquidity.

'ASIC Benchmarks and Disclosure Principles'

1 We may, at our discretion, accept lower minimum transaction and balance amounts.

ASIC Benchmarks and Disclosure Principles

The ASIC Benchmarks and Disclosure Principles are aimed at assisting investors to understand the risks of investing in hedge funds and assess whether such investments are suitable for them.

The following table provides a summary of the benchmarks and disclosure principles addressed in this PDS. Further information relating to each benchmark and disclosure principle is set out in the ASIC Benchmarks and Disclosure Principles Report (**Benchmark Report**), which also forms part of this PDS, available at www.fidante.com/OXCDEMFBR.pdf.

The information in the Benchmark Report will be updated periodically. A copy of the Benchmark Report and any updated information is available on the Fidante website or will be given to you, without charge, upon request by calling our Fidante Investor Services Team on 1300 721 637.

ASIC Benchmark	Description	Summary	Reference
ASIC Benchmark 1: Valuation of assets	This benchmark is intended to support investor confidence in the value of the non-exchange traded assets of the Fund by addressing whether valuations of a fund's non-exchange traded assets are provided by an independent administrator or an independent valuation service provider.	This benchmark is met as the Responsible Entity has in place a policy to ensure valuations of the non-exchange traded assets will be provided by an independent external provider.	For additional information in relation to the valuation of assets, please refer to 'Benchmark 1: Valuation of assets' in the Benchmark Report as well as 'Unit prices and valuing assets and liabilities' in this PDS.
ASIC Benchmark 2: Periodic Reporting	This benchmark is aimed at ensuring that investors receive timely, basic fund investment performance information on a periodic basis to make informed investment decisions.	This benchmark is met as the Responsible Entity has implemented a policy to provide detailed periodic updates to investors on certain key information in relation to the Fund on an annual and monthly basis as required.	For additional information in relation to periodic reporting, please refer to 'Benchmark 2: Periodic reporting' in the Benchmark Report as well as 'Monitoring your investment' in this PDS.
ASIC Disclosure Principle 1: Investment strategy	This disclosure principle is intended to ensure that investors can make informed decisions about the Fund by disclosing details of the investment strategy for the Fund, including the type of strategy, how it works in practice and how risks are managed.	<p>The Fund aims to provide an absolute return and capital growth over the long term and outperform its benchmark (MSCI Emerging Markets Net Total Return Index (AUD) Unhedged) after costs over rolling five year periods.</p> <p>The investment universe is primarily comprised of companies listed in, or that gain significant exposure from, Asian (ex Japan) and emerging markets.</p> <p>The Fund can invest in equity securities (including ordinary shares, preference shares, partly paid shares, convertible securities, participation notes, equity-linked notes, warrants and rights) as well as equity-linked derivatives such as CFD's, total return swaps, options (OTC and ETO) and equity index futures.</p>	For additional information in relation to the investment strategy, please refer to 'Disclosure principle 1: Investment strategy' in the Benchmark Report and 'How we invest your money' and 'Risks of investing in managed investment schemes' in this PDS.

ASIC Benchmark	Description	Summary	Reference
ASIC Disclosure Principle 1: Investment strategy (continued)		<p>The Fund may short sell stocks or indices where Ox Capital believe a security is overvalued or for hedging purposes (to protect capital). Shorting of stocks or indices will be used judiciously and will primarily be implemented through swap agreements. Derivatives may also be used as a means of efficiently gaining exposure to underlying companies or markets.</p> <p>Ox Capital may use leverage to increase the exposure of the Fund to investment markets.</p> <p>Investors in the Fund are exposed to risks at both the company level and market level. The key risks and how they are managed are set out in this PDS.</p> <p>The Responsible Entity may change the investment strategies, benchmarks, asset allocation ranges and processes of the Fund and unitholders will be notified in writing if such a change is considered by the Responsible Entity to be material or would not have been reasonably expected by unitholders.</p>	
ASIC Disclosure Principle 2: Investment manager	This disclosure principle is intended to ensure that investors have the necessary information about the people responsible for managing the Fund's investments, as well as arrangements between the responsible entity and any investment manager.	As Responsible Entity of the Fund, Fidante have appointed Ox Capital as the investment manager of the Fund to invest and manage the Fund's portfolio. Fidante is entitled to terminate the investment manager's appointment in writing, under various circumstances, with a minimum five business days' notice of termination.	For additional information in relation to the investment manager, please refer to 'Disclosure Principle 2: Investment manager' in the Benchmark Report.
ASIC Disclosure Principle 3: Fund structure	This disclosure principle is intended to ensure that the investment structures involved, the relationships between entities in the structure, fees and other costs payable to the Responsible Entity and investment manager, jurisdictions involved, the due diligence performed on underlying funds, and the related party relationships within the structure are explained.	<p>The Fund is a registered managed investment scheme with the ability to have multiple unit classes.</p> <p>The Fund's constitution grants us a broad power to quote a class of units (including Class A units) in the Fund on a Securities Exchange. Subject to the terms of the Fund's constitution, while a class is quoted, we may act as a market maker for the Fund to provide liquidity for the class of units quoted on a Securities Exchange and facilitate settlements on the Fund's behalf.</p> <p>There are a number of service providers that support the Fund such as Fidante (the Responsible Entity of the Fund), Boardroom Pty Limited who acts as the Fund's registry provider and Citibank N.A., Hong Kong Branch (Citi) who acts as custodian of the Fund.</p>	For additional information in relation to the Fund structure, please refer to 'Disclosure Principle 3: Fund structure' in the Benchmark Report and 'Risks of investing in managed investment schemes' in this PDS.

ASIC Benchmark	Description	Summary	Reference
ASIC Disclosure Principle 3: Fund structure continued		<p>The Responsible Entity has entered into separate agreements with each of its service providers which set out the terms and conditions of the relationship, as well as the consequences of any breaches to the terms of the relationship.</p> <p>The Responsible Entity may enter into transactions with, and use the services of, any of our related entities. These arrangements will be based on arm's length commercial terms.</p> <p>The keys risks to the Fund's structure are counterparty risk, currency risk, fund risk and service provider risk.</p>	
ASIC Disclosure Principle 4: Valuation, location and custody of assets	This disclosure principle is intended to ensure that the Responsible Entity of the Fund discloses the types of assets held, where they are located, how they are valued and the custodial arrangements.	<p>The Fund primarily invests in Asian and emerging market companies and derivatives.</p> <p>The Fund has a valuation policy where assets and liabilities are usually valued each NSW business day. Generally, for unit pricing purposes, listed securities are valued using the last available market close price quoted on the relevant exchange. Any other assets such as cash and cash receivables are valued at recoverable value.</p> <p>The assets of the Fund are held by Citi as the custodian of the Fund.</p>	For additional information in relation to the valuation of assets in the Fund, please refer to 'Disclosure principle 4: Valuation, location and custody of assets' in the Benchmark Report, 'How we invest your money' and 'Unit prices and valuing assets and liabilities' in this PDS.
ASIC Disclosure Principle 5: Liquidity	This disclosure principle is intended to ensure that investors are made aware of the Fund's ability to realise its assets in a timely manner and the risks of illiquid classes of assets.	This disclosure principle is currently not applicable to the Fund as the Responsible Entity of the Fund can reasonably expect to realise at least 80% of its assets, at the value ascribed to those assets in calculating the Fund's net asset value within 10 days.	For additional information in relation to liquidity, please refer to 'Disclosure Principle 5: Liquidity' in the Benchmark Report.
ASIC Disclosure Principle 6: Leverage	This disclosure principle is intended to ensure that investors are made aware of the maximum anticipated and allowed level of leverage of the Fund (including leverage embedded in the assets of the Fund).	Ox Capital may use leverage to increase the exposure of the Fund to investment markets. Leverage will generally be obtained through the use of derivative instruments. Although the maximum allowable leverage permitted in the Fund is 150% of the Fund's NAV, the Fund's positions in long securities and derivatives and overall net equity exposure will generally not exceed 100% of the Fund's NAV. The Fund must provide collateral to secure its obligations under the relevant agreements.	For additional information in relation to the use of leverage in the Fund, please refer to 'Disclosure Principle 6: Leverage' in the Benchmark Report and 'Additional information about the Fund's investments' in this PDS.

ASIC Benchmark	Description	Summary	Reference
ASIC Disclosure Principle 7: Derivatives	This disclosure principle is intended to ensure that investors are made aware of the purpose and types of derivatives used by the Responsible Entity or investment manager, and of the associated risks.	<p>The primary use of derivatives is through exposure to equity swaps and index futures, which may be used to gain or avoid exposure to particular stocks and markets, and to manage the net equity exposure of the Fund. Derivatives may also be used as a risk management tool (such as managing the effect of foreign currency movements).</p> <p>The Fund will use both exchange traded and OTC derivatives to implement its investment strategy and achieve its investment objective. The Fund can invest in derivatives such as swaps, futures, options, warrants and currency derivatives including forwards.</p> <p>The main risks to the Fund as a consequence of dealing in derivatives are counterparty risk and derivative risk.</p>	For additional information in relation to how derivatives are used in the Fund, please refer to 'Disclosure Principle 7: Derivatives' in the Benchmark Report, and 'How the Fund uses short selling' and 'Risks of investing in managed investment schemes' in this PDS.
ASIC Disclosure Principle 8: Short selling	This disclosure principle is intended to ensure that investors are made aware of how short selling may be used as part of the investment strategy, and of the associated risks and costs of short selling.	<p>The Fund uses short selling as an investment technique where Ox Capital believe a stock or market is overvalued or for hedging purposes. Short positions are taken on particular stocks or markets where Ox Capital believes a stock or market is overvalued and it is expected that these stocks or markets will fall in price, or for hedging purposes.</p> <p>Short selling may expose the Fund to risks such as short position risk, liquidity risk and counterparty risk.</p>	For additional information in relation to how short selling is used in the Fund, please refer to 'Disclosure Principle 8: Short selling' in the Benchmark Report, and 'How the Fund uses short selling' and 'Risks of investing in managed investment schemes' in this PDS.
ASIC Disclosure Principle 9: Withdrawals	This disclosure principle is intended to ensure that investors are made aware of the circumstances in which the Fund allows withdrawals and how these might change.	If a situation occurs where the assets that the Fund invests in are no longer able to be readily bought and sold, or market events reduce the liquidity of a security of an asset class, there is a risk that the generally applicable timeframe of five business days for meeting withdrawal requests may not be able to be met. This is because it may take longer to sell these types of investments at an acceptable price.	For additional information in relation to withdrawals from the Fund, please refer to 'Disclosure Principle 9: Withdrawals' in the Benchmark Report and 'Additional information about withdrawing your investment' in this PDS.

How we invest your money

Investment return objective	<p>The Fund aims to provide an absolute return and capital growth over the long term and outperform its benchmark after costs over rolling five year periods.</p>
Minimum suggested investment timeframe	<p>at least 5 years</p>
Benchmark	<p>MSCI Emerging Markets Net Total Return Index (AUD) Unhedged</p>
Risk level	<div style="text-align: center;">  </div> <p>Refer to 'Additional information about the Fund's investments' for further information about the Fund's risk.</p>
Description of the Fund	<p>The Fund seeks to build a concentrated portfolio of high quality, undervalued, well run companies in Asia (ex-Japan) and other emerging markets. The Fund will seek to identify growing companies that can benefit from high conviction structural and cyclical themes using an investment process which incorporates detailed top-down, bottom-up and thematic research and quantitative analysis. The end portfolio will typically be 30-50 stocks that are diversified across countries, sectors and thematic exposure. Derivatives may be used to reduce or gain exposure to markets and securities. The Fund may short sell securities and markets where it believes that a security or market is overvalued or for hedging purposes.</p> <p>The Fund is intended to be suitable for investors who are happy to invest for at least five years, are seeking high levels of return and are comfortable with high volatility, including the possibility of periods of negative returns. To help you understand the following information relating to the Fund's investments, definitions of the important investment terms are provided in 'Important investment terms' table.</p> <p>Investment approach</p> <p>Ox Capital's investment approach is to identify the immense changes taking place in Asia and other key emerging markets and to find opportunities that can benefit. Through this approach they seek to:</p> <ul style="list-style-type: none"> • Buy good businesses that are positioned to take advantage of changing dynamics as a result of rapid economic growth in Asia and other key emerging markets; • Buy when companies are trading at a discount to Ox Capital's assessment of intrinsic value; and • Protect the portfolio against periods of volatility using a combination of top down and bottom up quantitative and qualitative analysis. Otherwise the approach is to let these company's value compound to capture long term growth. <p>Ox Capital views good businesses as having the following characteristics:</p> <ul style="list-style-type: none"> • long runway (long term growth potential); • persistent pricing power (sustainable profitability); • superior management capability (ability to reap rewards of its strong position); and • better or rapidly improving environmental, social and governance (ESG) credentials. <p>Ox Capital uses quantitative modelling to interpret the immense amount of data available and provide a bird's eye view of how macro conditions impact equity markets. Ox Capital's proprietary Macro Overlay Tracking (MOAT) model aims to provide a systematic and unbiased measure of economic conditions and a framework of how different stock sectors and regional markets behaved differently in the pre-defined economic environments of every key market. Key inputs into the MOAT model include macro data points (such as credit impulse, inflations & GDP), triangulated by bottom up earnings projections by sell-side analysts. This has proven to be profitable when the general consensus differs from the data produced by the MOAT model, allowing Ox Capital to position the portfolio aggressively or conservatively in opportune times.</p>

Description of the Fund continued

Investment universe and portfolio construction

The investment universe is primarily comprised of companies listed in, or that gain significant exposure from, Asian (ex Japan) and emerging markets.

The Fund can invest in equity securities (including ordinary shares, preference shares, partly paid shares, convertible securities, participation notes, equity-linked notes, warrants and rights) as well as equity-linked derivatives such as CFD's, total return swaps, options (OTC and ETO) and equity index futures.

The Fund may short sell stocks or indices where Ox Capital believe a security is overvalued or for hedging purposes (to protect capital). Shorting of stocks or indices will be used judiciously and will primarily be implemented through equity swaps. Derivatives may also be used as a means of efficiently gaining exposure to underlying companies or markets.

Ox Capital may use leverage to increase the exposure of the Fund to investment markets. Leverage will generally be obtained through the use of derivative instruments. Although the maximum allowable leverage permitted in the Fund is 150% of the Fund's Net Asset Value (**NAV**), the Fund's positions in long securities and derivatives and overall net equity exposure will not exceed 100% of the Fund's NAV.

The investment universe includes non-Asian and non-emerging markets, such as the United States, United Kingdom and Japan, subject to companies generating the majority of their annual sales revenue from Asian (ex Japan) and emerging markets, or where Ox Capital believe a companies prospects for future growth are linked to the immense changes taking place in Asia and other key emerging markets.

The final portfolio will typically be made up of between 30 to 50 stocks (with the flexibility to go from 20 to 80), constructing a portfolio that is diversified across countries, sectors and thematic exposure.

Portfolio construction is the ultimate responsibility of the Chief Investment Officer (**CIO**) with stock research and selection being debated by the broader team of portfolio managers and analysts. The business has been structured as a "hub-and-spoke" model, with the CIO having significant interaction with each portfolio manager/analyst at all stages of the idea generation and research process to reduce loss of information fidelity at the final investment decision making stage.

Portfolio construction guidelines are applied to ensure the final portfolio is consistent with the Fund's objectives and is managed in a risk-controlled manner.

Currency strategy

The Fund is unhedged to the AUD. However, if Ox Capital have a strong macro view to hedge currency exposures they may implement active currency hedging through the use of derivatives.

Strategic asset allocation ranges¹

Asset class ²	Min (%)	Max (%) ³
Long securities	50	150 ⁴
Short securities	0	50
Gross equity exposure	50	150
Net equity exposure	50	150 ⁴
Cash ⁵	0	50

¹These are asset allocation ranges for the Fund. If market movements, investments into or withdrawals from the Fund, or changes in the nature of an investment, cause the Fund to move outside these ranges, or a limit set out in this PDS, this will be addressed by us or Ox Capital as soon as reasonably practicable.

²Equity exposure is the combination of long and short equity exposure, including derivatives.

³Includes use of leverage to increase exposure of the Fund to investment markets.

⁴Typical long securities and net equity exposure will not exceed 100%

⁵These ranges represent the effective cash exposure (after the cash cover for derivatives has been taken into account)

Labour standards or environmental, social or ethical (ESG) considerations

Ox Capital takes into account labour standards and environmental, social and ethical considerations when selecting, retaining or realising underlying investments. Ox Capital does not adhere to any particular set of standards but implements an investment process that favours sustainable companies and those that are on a positive ESG trajectory. Ox Capital's consideration of these factors is detailed further in 'Additional information about the Fund's investments'.

Changes to investment policy

The Constitution permits a wide range of investments and gives us, as Responsible Entity, broad investment powers. We may change the investment manager and/or vary the investment objectives, strategies, benchmarks, asset allocation ranges and processes of the Fund. We will give unitholders written notice of any material variation which we believe they would not have reasonably expected.

Additional information about the Fund's investments

About the Fund's risk level

The risk level, also known as the Standard Risk Measure, is based on the estimated number of negative annual returns that a managed investment scheme may experience in any 20-year period. In other words, it is a measure of the expected variability of the return of the Fund.

The Fund's anticipated risk level is 'Very high risk' - the Fund offers the potential for favourable levels of return over the long term but may exhibit higher levels of volatility with the potential for capital loss over the short to medium term. The estimated number of negative annual returns in any 20-year period based on this risk level is approximately greater than 6. Note that this is an estimate only. Negative annual returns may or may not occur in consecutive years and, should they be negative, the estimate does not indicate the size of the potential negative return (which may vary considerably from strategy to strategy).

The stated risk levels are based on industry guidance and are designed to allow investors to compare investments with different investment strategies and characteristics. However, investment managers and investment administrators may employ different methodologies to determine a risk level and therefore may not be representative of the same considerations. Furthermore, it is not a complete assessment of the risks of investing, nor does it indicate if an investment strategy is designed to meet an investor's investment objectives.

For further information, or to ask about the methodology for determining the risk level, please call the Fidante Investor Services Team.

Borrowings of the Fund

The Fund's constitution allows for borrowing; however, we will generally not borrow on behalf of the Fund, except from time to time to cover short-term cash flow needs or if emergency or extraordinary situations arise. Ox Capital may use leverage to increase the

exposure of the Fund to investment markets.

Leverage will generally be obtained through the use of derivative instruments. The maximum allowable leverage permitted in the Fund is 150% of the Fund's NAV. Please refer to 'Gearing and leverage' under 'Additional information about the Fund's investments' for further information on how the Fund may use gearing and leverage.

Borrowings may be from a variety of sources, including related entities. Where funds are borrowed from related entities, the terms are set on a commercial and arm's length basis and will be for reasonable remuneration.

The availability and terms of borrowings are subject to the market for borrowings (including market conditions in debt and other markets) and therefore borrowings may not always be available. Lenders may refuse to provide borrowings, renew an existing borrowing facility or refuse to renew on commercially acceptable terms. This may be for reasons specific to the Fund or due to market-wide events.

We may change the lending financial institution (if any) from time to time and may also seek to vary the terms of any borrowing facility where it is believed it would be in the best interests of unitholders.

Asset allocation ranges

The Fund gains exposure to various investment markets and asset classes by investing into direct assets and/or indirectly via managed funds. References to asset allocations are references to the exposure of the Fund, not necessarily the physical unit or security held.

Refer to 'How we invest your money' for strategic asset allocations for the Fund.

If market movements, investments into or withdrawals from the Fund, or changes in the nature of an investment cause the Fund to exceed these asset allocations, or a limit set out in the PDS, this will be addressed by us or Ox Capital as soon as reasonably practicable.

How the Fund uses derivatives

The Fund may, at times, invest in or obtain exposure to derivatives, such as swaps, futures, options and foreign exchange forwards.

The primary use of derivatives is through exposure to equity swaps and index futures, which may be used to gain or avoid exposure to particular stocks and markets, and manage the net equity exposure of the Fund.

The term 'derivative' is used to describe any financial product that has a value that is derived from another security, liability, or index.

Derivatives may be used to gain exposure when they offer a more cost-effective way of purchasing the underlying security. Derivatives can be used to implement investment decisions, and as a risk management tool (such as managing the effect of foreign currency movements). They may also be used to adjust or implement investment decisions and to gain, or avoid, exposure to a particular market rather than purchasing physical assets.

The Constitution permits the use of derivatives and Ox Capital may gear the Fund through the use of derivatives. The use of derivatives may result in the investment exposure of the Fund to exceed 100% of the Fund's NAV. Where the Fund uses derivatives, Ox Capital aims to manage the Fund to keep sufficient liquid assets in the Fund to meet all obligations associated with the derivatives.

The use of derivatives may expose the Fund to certain risks. Please refer to 'Derivative risk' and for more information.

Gearing and leverage

Gearing and leverage can be useful tools to enhance the returns of the Fund. Gearing can be obtained by using an asset as a security for borrowing money to increase the amount of money available to invest.

Leverage can be obtained by either of the following methods:

- Using derivative instruments to increase the Fund's investment exposure beyond the net asset value of the Fund; or
- Borrowing a share to sell on the market.

Ox Capital uses leverage to increase the exposure of the Fund to investment markets. Leveraged market exposure will generally be obtained through the use of derivative instruments, including swaps, futures and options.

The maximum allowable leverage permitted in the Fund is 150% of the Fund's NAV, that is, for every \$1 of the Fund's NAV, the Fund may have investment exposure (including all securities and derivatives) of \$1.50. Typically the Fund's positions in long securities and

derivatives and overall net equity exposure will not exceed 100% of the Fund's NAV. In this calculation, the market value of physical securities, and notional value of derivatives is used.

How the Fund uses short selling

The Fund can use short selling as an investment technique. The Fund will primarily short sell through the use of derivatives, including single stock and index swaps.

Short selling occurs when the Fund takes a short position in a market or stock (via swap agreements). If the market or stock drops in price, the Fund will benefit, as the price it entered into the short position is higher than the current price. If the price rises, the Fund will make a loss as the price it entered into the short position is lower than the current price. Short positions on markets or particular stocks are taken when it is expected that specific markets or stocks will fall in price.

Labour standards or environmental, social or ethical considerations

The Responsible Entity (Fidante) does not itself take into account labour standards and environmental, social and ethical considerations for the purposes of selecting, retaining or realising investments.

Fidante has delegated investment decisions for the purposes of selecting, retaining or realising investments for the Fund to Ox Capital who operates the Fund in accordance with the investment management agreement. Fidante's parent Challenger Limited is a member of the PRI Association (**PRI**), a leading promoter of responsible investment practices supported by the United Nations.

Fidante incorporates consideration of environmental, social and governance considerations when selecting, appointing and monitoring investment managers. Fidante Partners does not adhere to any particular set of labour standards, environmental, social and ethical considerations.

Ox Capital takes into account labour standards and environmental, social and ethical considerations when selecting, retaining or realising investments.

The investment process favours sustainable companies and those that are on a positive ESG trajectory. Ox Capital aims to invest in companies with good governance that are well positioned to benefit from global ESG trends.

Ox Capital assess material ESG risks and engage with investee companies to mitigate those risks.

For more information on Ox Capital's ESG Policy please contact info@fidante.com.au.

Investment Sanctions

The Fund may have exposure to securities which are subject to foreign government imposed sanctions or restrictions. The Fund aims to avoid direct investment in securities that are subject to these sanctions, however, it may have indirect exposure through its use of index securities or derivatives. These sanctions may prevent a citizen/entity of the country imposing the sanction from investing in, or continuing to hold units in, a fund which has exposure to sanctioned securities.

Due to the countries the Fund may invest in and considering the foreign government sanctions imposed as at the date of this PDS, the Fund is not suitable for U.S. investors.

Risks of investing in managed investment schemes

All investments carry risk. Different strategies carry different levels of risk depending on the assets that make up the strategy. Generally, assets with the potential for the highest long-term returns may also carry the highest level of risk.

When investing in an MIS, it is important to note that the value of assets in the MIS and the level of returns will vary. No return is guaranteed. Future returns may differ from past returns and investors may lose some or all of their money invested. Additionally, laws (including tax laws) that affect MIS may change in the future, which may have an adverse effect on the returns of MIS.

The level of acceptable risk will vary across investors and will depend upon a range of factors such as age, investment timeframe, where other parts of the investor's wealth is invested and the investor's level of risk tolerance.

New Zealand investors need to be aware there are differences in how securities are regulated under Australian laws. For example, the disclosure of fees may be different and the rights, remedies and compensation arrangements available to New Zealand investors may differ.

The risks set out in this section are general only and are not exhaustive. Prospective investors should consider obtaining independent financial advice to determine if an investment in the Fund is appropriate in light of their financial situation, objectives and needs.

Risks of investing in managed investment schemes

Risk	Explanation
Collateral risk	The Fund enters into derivatives arrangements that require it to deliver (or 'post') collateral to the derivative counterparty or clearer. As a result, the Fund may be exposed to certain risks in respect of that collateral including the credit risk of the counterparty or clearer.
Counterparty risk	The Fund is, to a certain extent, reliant on external counterparties in connection with its operation and investment activities. There is a risk with these arrangements that the other party to a contract (such as derivatives contract, physical security or foreign exchange contract trade) may fail to perform its contractual obligations either in whole or part. In such circumstances, any collateral lodged with counterparties related to these derivatives may also be at risk. This may result in the investment activities of the Fund being adversely affected.
Cross-class liability risk	Where multiple classes of units are on issue in the Fund, while it is generally the case that all assets and liabilities of a unit in a particular class are referable to that class, each class is not a separate legal entity and accordingly, the assets and liabilities of each class will not be segregated. This means that all of the assets of the Fund are available to meet the liabilities of any given class even in circumstances where the assets applied to meet the class liability are not referable to that class. Such cross-class liability risk may arise where a liability is incurred in relation to a particular class but there are insufficient available assets referable to the class to meet that liability or where the losses sustained by that class are in excess of the assets referable to that class.
Currency risk	Some investments held by the Fund may be denominated in a currency different to Australian Dollars. The value of these investments may fluctuate in Australian dollar terms because of fluctuations in currency exchange rates. As an example, a rise in the Australian dollar relative to other currencies may negatively impact investment value or returns. Conversely, a decline in the Australian dollar relative to other currencies may positively impact investment returns.

Derivative risk

The value of a derivative is linked to the value of an underlying asset and can be volatile. While the use of derivatives offers the opportunity for higher gains, it can also magnify losses to the Fund. Risks associated with using derivatives might include the value of the derivative failing to move in line with that of the underlying asset, potential illiquidity of the derivative, the Fund not being able to meet payment obligations as they arise or the risk that the other party with whom the derivative contract is held will fail to perform its contractual obligations. Refer to 'Counterparty risk' and 'Collateral risk'.

There are certain risks associated with the collateral requirements of derivative counterparties, particularly when over-the-counter (**OTC**) derivatives are used. This may involve the Fund providing margin financing or equivalent securities to the counterparty and the Fund may have a right to the return of equivalent assets. The margin or equivalent securities may exceed the value of the Fund's obligations to the counterparty where the counterparty requires excess margin or collateral. Counterparty risk is particularly prevalent in OTC derivative contracts as it centres on the creditworthiness of the counterparty and the potential for default or failing to perform an obligation in the manner and time agreed between the parties.

Ox Capital may gear the Fund through the use of derivatives as part of the investment process. Derivative holdings may result in notional exposures that are greater than the underlying assets in the Fund.

Emerging market risk

The Fund provides exposure to emerging markets. Emerging market risk refers to potential adverse political, economic or social developments affecting investment returns from these investments. Emerging markets are generally considered riskier than developed markets due to factors such as lower liquidity and unstable political environments that may lead to greater volatility in returns from such investments.

This includes investing in companies in developing countries or investing in companies in developed countries with activities exposed to emerging markets. Investment returns can be more volatile than returns of developed markets due to the legal, political, business and social frameworks being less developed than those in more established market economies.

Examples of heightened risks include political or social instability, less government regulation of business, stock exchanges and industry practices, government manipulation of currency or capital flows, inflation, deflation or currency devaluation, and greater sensitivity to interest rates and commodity prices.

Equity security risk

The value of an individual equity security (also known as a share) may be affected by market sentiment and other factors that may impact the performance of the actual company over short or extended periods of time. Investing in shares of a company will expose an investor to many of the risks to which the individual company is itself exposed. They include many factors, such as changes in management, technology, and a company's financial health, actions of competitors, regulators and market trends. Share markets tend to move in cycles, and the individual share price of a security may fluctuate.

Equities may also be affected by dilutive equity issuance or changes to dividend policy.

Such risk is considered by Ox Capital through its investment process and managed by maintaining a diversified portfolio of securities.

Investment returns from international shares are also affected by exchange rate fluctuations. The currency exposure from the Fund's international equity investments may be hedged or partially hedged into the Australian dollar. Refer to 'Currency strategy' under How we invest your money for more information.

Fund risk

Fund risk refers to specific risks associated with the Fund, such as termination, changes to fees, or changes in government policies (including taxation, investment sanctions, regulations and laws) that may affect the Fund or investors in the Fund. We may close the Fund to further investments if, for example, we consider it appropriate given the investment objective and investment strategy of the Fund. We may also terminate the Fund by notice to unitholders.

Your investment in the Fund is governed by the terms of the Constitution and the PDS of the Fund (each as amended from time to time), the Corporations Act (where applicable), and other laws. The value or tax treatment of an investment in the Fund or its underlying assets, or the effectiveness of the Fund's trading or investment strategy may also be adversely affected by changes in government policies (including taxation), regulations and laws, or changes in generally accepted accounting policies or valuation methods. Such changes could also make some investors consider the Fund to be a less attractive investment option than other investments, prompting greater than usual levels of withdrawals, which could have adverse effects on the Fund.

Sanctions may be imposed by governments or international bodies which may impact the Fund's investments and its investors. These sanctions may prevent a citizen/entity of the country imposing the sanction from investing in, or continuing to hold units in, a fund which holds those sanctioned securities.

There is also a risk that investing in the Fund may give different results from holding the underlying assets of the Fund directly because of:

- income or capital gains accrued in the Fund at the time of investing; and
- the consequences of investment and withdrawal decisions made by other investors in the Fund; for example, a large level of withdrawals from the Fund may lead to the need to sell underlying assets which would potentially realise income and/or capital gains.

We aim to manage these risks by monitoring the Fund and by acting in investors' best interests. In the event of winding up the Fund, we will realise all the Fund's assets, which will generally result in the crystallisation of tax positions (both income and capital) at that time.

Leverage risk

The use of borrowed money or gearing within the Fund will increase investment exposure and can magnify the potential gains and losses from investments and increase the volatility of the Fund's total return. Gearing also increases the risk of the Fund not meeting the financial obligations of the borrowing, including but not limited to the cost of the borrowing and refinancing risk.

Liquidity risk

Liquidity risk is the risk that the Fund will not have adequate cash resources to meet its short-term financial commitments as they fall due (including meeting the Fund's objective and investors' expectations for payment of redemptions).

Liquidity risk may also occur due to the absence of an established market or a shortage of buyers for an investment which can result in a loss if the holder of the investment needs to sell it within a particular timeframe.

Liquidity risk can also occur due to pandemics and other widespread public health emergencies such as the outbreak of COVID-19 which may cause volatility and declines in markets for financial assets (refer to 'Market risk' below) which in turn may impact the liquidity of the Fund.

Certain investments may be typically less liquid than other investments or pose a higher risk of becoming illiquid during times of market stress. The less liquid the investment, the more difficult it may be to sell the investment when it is desirable to do so or to realise what the investment manager perceives to be fair value in the event of a sale.

If an investor or a group of investors in a fund with exposure to less liquid assets seek to make large withdrawals, then selling assets to meet those withdrawals may result in a detrimental impact on the price we receive for those assets. In certain circumstances, we may suspend or otherwise restrict withdrawals (refer to 'Withdrawal risk') to allow sufficient time for a more orderly liquidation of assets to meet the withdrawals.

Market risk	<p>The Fund may experience investment losses due to factors that result in market volatility and disruption and affect the overall performance of the financial markets. These events may include changes in spreads, macro-economic, regulatory, social and political conditions, weather events, terrorism, changes in technology, the environment and market sentiment and pandemics and other widespread public health emergencies including outbreaks of infectious diseases such as COVID-19.</p> <p>Often assets from less developed regions or markets display higher levels of volatility of investment return than assets in mature markets.</p>
Service provider risk	<p>The Fund may be reliant on external service providers in connection with their operation, such as the custodian and registry provider. There is a risk with these arrangements that the service providers may default in the performance of their obligations or seek to terminate the services with the result that the Fund may be required to seek an alternative supplier and, in the interim, investment activities and other functions of the Fund may be affected.</p>
Short position risk	<p>As establishing a short position involves 'borrowing' a security (directly, or indirectly through an equity swap), a different assessment of risk is required compared to the risk assessment of investing in the security directly. When investing in a security directly, the maximum loss is generally limited to the amount invested. With a short position, there is no limit to how much an investor can lose if the price of the security continues to rise. This is because a rising share price means the borrower (i.e. the Fund) must pay a higher price to close the short position.</p> <p>Short selling will increase the Fund's exposure to investment markets above 100% of its net assets. This in turn may magnify the exposure to other investment risks detailed in this section.</p> <p>Short positions are also affected by risks associated with the lender of the security or counterparty. There is the risk that the securities lender or counterparty may recall a security that has been borrowed, or close a short position at any time. This means the borrower (i.e. the Fund) will have to find another securities lender or counterparty willing to enter the short position within a short period of time. This may force the borrower to close the short position at an unfavourable price.</p> <p>Refer to 'Additional information on the Fund's investments' for how the Fund engages in short selling.</p>
Withdrawal risk	<p>If a situation occurs where the assets that the Fund invests in are no longer able to be readily bought and sold, or market events reduce the liquidity of a security or asset class, there is a risk that the generally intended timeframe of 5 business days for meeting withdrawal requests may not be able to be met. This is because it may take longer to sell these types of investments at an acceptable price. In this case, withdrawals from the Fund may take significantly longer than the generally applicable timeframe and may need to be suspended (see 'Suspending withdrawals' for more information).</p> <p>The maximum timeframe in which we, as Responsible Entity, have to meet a withdrawal request is set out in the Constitution. Where the Fund is not liquid (as defined in the Corporations Act), you may only withdraw when we make an offer to withdraw to all investors, as required by the Corporations Act. Please refer to 'Additional information about withdrawing' for further information about an investor's ability to withdraw when the Fund is liquid, including the timeframes, and an investor's ability to withdraw if the Fund is not liquid.</p>

Fees and other costs

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long term returns. For example, total annual fees and costs of 2% of your account balance rather than 1% could reduce your final return by up to 20% over a 30 year period (for example, reduce it from \$100,000 to \$80,000). You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs. You may be able to negotiate to pay lower fees. Ask the fund or your financial adviser.

TO FIND OUT MORE

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC)** Moneysmart website (www.moneysmart.gov.au) has a managed funds fee calculator to help you check out different fee options.

This section shows fees and other costs that you may be charged. These fees and costs may be deducted from your money, from the returns on your investment or from the assets of the managed investment scheme as a whole. Taxes are set out in another part of this document. You should read all the information about fees and costs because it is important to understand their impact on your investment.

Fees and costs summary

Ox Capital Dynamic Emerging Markets Fund		
Type of fee or cost	Amount ⁷	How and when paid
Ongoing annual fees and costs		
<p><i>Management fees and costs</i>^{1,2,3,4}</p> <p>The fees and costs for managing your investment</p>	<p>The management fees and costs of the Fund are 1.00% p.a. of the net asset value of the Fund</p>	<p>The amount quoted is made up of the following three components:</p> <p>Management fees, which are calculated and accrued daily and paid monthly in arrears from the Fund's assets on or around the last business day of the month.</p> <p>Indirect costs (if any), which are deducted from the Fund's assets, accrued daily in the net asset value, and then paid as and when due.</p> <p>Recoverable expenses, which may be abnormal operating expenses (if any) that, if charged, will be deducted from the Fund's assets, and paid as incurred; and/or normal operating expenses and investment expenses, which are paid out of the management fee.</p>
<p><i>Performance fees</i>⁵</p> <p>Amounts deducted from your investment in relation to the performance of the product</p>	<p>We estimate that the performance fee of the Fund will be 0.30% p.a. of the net asset value of the Fund.</p>	<p>The performance fee is deducted from the Fund's assets and paid quarterly. It is calculated according to the Fund's particular methodology.</p>
<p><i>Transaction Costs</i>⁶</p> <p>The costs incurred by the scheme when buying or selling assets</p>	<p>The net transaction costs incurred by the Fund for the last financial year were approximately 0.98% p.a. of the net asset value of the Fund</p>	<p>Transaction costs are deducted from the assets of the Fund as and when they are incurred (where not otherwise recovered through the buy/sell spread).</p>

Member activity related fees and costs (fees for services or when your money moves in or out of the scheme)		
<i>Establishment fee</i> The fee to open your investment	Not applicable	Not applicable
<i>Contribution fee</i> The fee on each amount contributed to your investment	Nil	Not applicable
<i>Buy-sell spread</i> An amount deducted from your investment representing costs incurred in transactions by the scheme	Estimated to be +0.25%/-0.25% of the investment or withdrawal amount	Charged at time of transaction and paid into the Fund when you invest in or withdraw from the Fund. The buy/sell spread is reflected in the unit price and is not separately charged to the investor.
<i>Withdrawal fee</i> The fee on each amount you take out of your investment	Nil	Not applicable
<i>Exit fee</i> The fee to close your investment	Not applicable	Not applicable
<i>Switching fee</i> The fee for changing your investment options	Nil	Not applicable

- 1 Unless otherwise stated, all fees and costs are quoted gross of income tax and any Goods and Services Tax (GST) and reduced by any input tax credits (ITCs) or reduced input tax credits (RITCs) as applicable. Where available, the prescribed RITC rate is currently 55% or 75%, depending on the nature of the fee or cost incurred. Due to the impact of GST, ITC and RITC calculations, actual fees may vary slightly from those stated and may be rounded to two decimal places.
- 2 For certain wholesale clients (as defined in the Corporations Act) we may, at our discretion, negotiate, rebate or waive all or part of our fees. Please refer to 'Can fees be different for different investors?' in 'Fees and other costs'.
- 3 All estimates of fees and costs in this section are based on information available as at the date of this PDS and reflect the Responsible Entity's reasonable estimates of the typical fees for the current financial year. The costs component of management fees and costs reflect the actual amount incurred for the last financial year and the Responsible Entity's reasonable estimates where information was not available as at the date of this PDS (adjusted to reflect a 12-month period where applicable). All figures have been rounded to two decimal places. Please refer to 'Management fees and costs' under the heading 'Additional explanation of fees and costs' for more information on management fees and costs.
- 4 Please refer to 'Other payments' under the heading 'Additional explanation of fees and costs' for more information on costs that may be payable.
- 5 The reasonable estimate of the performance fee is based on the average of the actual performance fees paid for the Fund over the previous 1 financial year(s). Past performance is not a reliable indicator of future performance and the Fund's actual performance fee will be based on the Fund's performance over the relevant period. Please refer to 'Performance fees' under the heading 'Additional explanation of fees and costs' for more information on performance fees.
- 6 Transaction costs are the costs associated with the buying and selling of the Fund's assets. These costs include brokerage, settlement costs, clearing costs, stamp duty and other government taxes or charges and include the transactional and operational costs incurred by the underlying assets. Transaction costs are recovered from the assets of the Fund as and when they are incurred. The amount quoted reflects the transaction costs not recovered by the buy/sell spread for the last financial year (adjusted to reflect a 12 month period where applicable), including our reasonable estimates where information about actual costs was unavailable at the date of this PDS.
- 7 'Nil' means there is an entitlement under the Constitution but we have elected not to charge it. 'Not applicable' means there is no entitlement for us to charge this fee.

Example of annual fees and costs for the Fund

This table gives an example of how the ongoing annual fees and costs in the Fund can affect your investment over a 1-year period. You should use this table to compare this product with products offered by other managed investment schemes.

EXAMPLE - Ox Capital Dynamic Emerging Markets Fund	BALANCE OF \$50,000 WITH A CONTRIBUTION OF \$5,000 DURING YEAR	
Contribution Fees	Nil	For every additional \$5,000 you put in, you will be charged \$0
Plus Management fees and costs	1.00% p.a. of the net asset value of the Fund	And , for every \$50,000 you have in the Fund, you will be charged or have deducted from your investment \$500 each year.
PLUS Performance fees	0.30% p.a. of the net asset value of the Fund	And , you will be charged or have deducted from your investment \$150 in performance fees each year.
PLUS Transaction costs	0.98% p.a. of the net asset value of the Fund	And , you will be charged or have deducted from your investment \$490 in transaction costs.
EQUALS Cost of the Fund		If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees of and costs of: \$1,140 What it costs you will depend on the investment option you choose and the fees you negotiate.

! This example assumes that the \$5,000 contribution is made at the end of the year and the value of the investment is otherwise consistent, therefore the management fees and costs associated above are calculated using the \$50,000 balance only. Please note that this is just an example. In practice, actual investment balances will vary daily and the actual fees and expenses we charge are based on the value of the Fund, which also fluctuates daily. Additional fees may apply. Please note that this example does not capture all the fees and costs that may apply to you such as the buy/sell spread. For a detailed explanation about all of the fees and costs that apply see the fees and costs summary above.

Additional explanation of fees and costs

Management fees and costs

The costs component of management fees and costs in the 'Fees and costs summary' reflects the actual amount incurred for last financial year and the Responsible Entity's reasonable estimates where information was not available as at the date of this PDS (adjusted to reflect a 12 month period). All figures have been rounded to two decimal places.

You should refer to the Fund's website at www.fidante.com from time to time for any updates which are not materially adverse to investors.

The total management fees and costs for the Fund, outlined in the 'Fees and costs summary' above include the management fee, indirect costs and recoverable expenses. They do not include the performance fees (if payable), the Fund's buy/sell spread or the transaction costs of underlying assets (as set out below).

The Fund's management fees and costs are payable from the Fund's assets (generally those being referable to the relevant class) and are not paid directly from your account. Each of these are explained further below.

For details of the maximum fees permitted under the Constitution, please refer to 'Maximum allowable fees'.

Management fee

This is the fee charged for managing the investments, overseeing the Fund's operations and providing access to the Fund. The management fee of the Fund is 1.00% p.a. of the net asset value of the Fund. It is calculated and accrued daily as a percentage of the net asset value of the Fund and payable monthly in arrears.

Indirect costs

Indirect costs are those amounts paid from the assets of the Fund that we know or, where required, reasonably estimate will reduce, whether directly or indirectly, the return of the Fund or the amount or value of the income of, or property attributable to, the Fund or an interposed vehicle in which the Fund invests. Indirect costs do not include the management fee, performance fee, or recoverable expenses as set out in this section.

Indirect costs of the Fund are estimated to be 0.00% p.a. of the Fund's net asset value, based on the actual amount incurred for the previous financial year and the Responsible Entity's reasonable estimate of such costs where information was not available as at the date of this PDS or where the Responsible Entity was unable to determine the exact amount.

Recoverable expenses

Normal operating expenses

We currently pay the normal operating expenses of the Fund (e.g. custody fees, audit fees, accounting fees, legal and regulatory fees) from the management fee and will not, without notice, recover these from the Fund's assets.

Abnormal expenses

We may recover abnormal expenses (such as costs of unitholder meetings, changes to the Constitution and defending or pursuing legal proceedings) from the Fund's assets. Whilst it is not possible to estimate such expenses with certainty, we anticipate that the events that give rise to such expenses will not occur regularly. In circumstances where such events do occur, we may decide not to recover these abnormal expenses from the Fund's assets.

The management fees and costs set out in the 'Fees and costs summary' above include abnormal expenses of 0.00% p.a. of the net asset value of the Fund, which is the amount actually incurred by the Fund for the previous financial year including the Responsible Entity's reasonable estimates where information was unavailable at the date of this PDS. If abnormal expenses are charged, they will be recovered from the Fund's assets when they are incurred. The amount quoted is not an indication or guarantee of the amount that may be charged in the future. At the date of this PDS, there is no intention to hold a unitholder meeting nor are we aware of any legal proceedings the Fund may be a part of that may require us to recover associated abnormal expenses from the Fund.

Investment expenses

We currently pay the standard investment management costs of the Fund from the management fee.

Performance fee

A performance fee is calculated on each business day. If the Fund's daily return (after fees and expenses, and after adding back any distributions paid) exceeds its defined Performance Benchmark, a performance fee may be payable.

The performance fee in the 'Fees and costs summary' above is a reasonable estimate based on the average of the actual performance fee paid for the Fund over the previous 1 financial year(s). Past performance is not a reliable indicator of future performance and the Fund's actual performance fee will be based on the Fund's performance over the relevant period. These amounts are inclusive of GST and income tax less reduced input tax credits.

The Performance Benchmark

The Performance Benchmark is the daily return of MSCI Emerging Markets Net Total Return Index (AUD) Unhedged (**Performance Benchmark**).

The Fund must outperform the Performance Benchmark before the performance fee becomes payable.

How is the performance fee calculated and paid?

The performance fee is calculated as 15% of the difference between the Fund's daily return (after fees and expenses, and after adding back any distributions paid) and the Performance Benchmark.

The performance fee payable is calculated on each business day. This daily performance fee amount can be positive or negative depending on whether or not the Performance Benchmark has been exceeded for that day. The cumulative performance fee amount on any given business day is the aggregate of all the daily performance fee amounts (both positive and negative) since a performance fee was last paid from the Fund up to and including the day before the calculation date (**Cumulative Performance Amount**).

Generally, the greater the investment performance of the Fund, the greater the Cumulative Performance Amount and therefore the greater the overall management costs for the Fund. The performance fee is estimated as 0.30% p.a. of net asset value of the Fund, calculated based on the average of the actual performance fees paid for the Fund over the previous 1 completed financial year(s).

If, on any given business day, the Cumulative Performance Amount is positive, then this positive amount will be incorporated into the Fund's unit price.

Performance fee – worked dollar example

The table below provides a dollar fee example based on an investor with a \$50,000 investment in the Fund. The example assumes no other applications or withdrawals have been made and the performance of the Fund and the Performance Benchmark remains constant during the relevant period. The performance fee is calculated and accrued (where applicable) into the unit price. For additional information about how unit prices are calculated, please refer to 'How unit prices are calculated'. The unit price of the Fund is assumed to be \$1.00 per unit. Please note that this is just an example and should not be taken as an indication or guarantee of future performance, nor an indication of the performance fee that may be charged in the future. We do not provide any assurance that the Fund will achieve the performance used in the examples and you should not rely on this in determining whether to invest in the Fund.

Any day where a negative fee is calculated, this will be deducted from any positive accumulated fee to reduce the Cumulative Performance Amount.

If, on any given business day, the Cumulative Performance Amount is negative, then no performance fee amount will be reflected in the Fund's unit price. The negative amount will need to be carried forward and will need to be offset by future positive performance fee amounts before any performance fee becomes payable.

The performance fee if payable, will be paid from the Fund for quarterly performance fee periods, ending 31 March, 30 June, 30 September and 31 December, where:

- the Cumulative Performance Amount for the Fund is positive; and
- the Fund's return is also positive for the relevant quarterly performance fee period.

If the Cumulative Performance Amount is positive, but the Fund's return (after fees and expenses) is negative, the performance fee is carried forward to the next quarterly performance fee period.

If the Cumulative Performance Amount at the end of a performance period is negative, no performance fee is payable to the Responsible Entity for that performance fee period and that amount must be subtracted from the Cumulative Performance Amount for the next performance fee period.

For historical performance fees, please contact the Fidante Investor Services Team on 1300 721 637. For additional information about how unit prices are calculated please refer to 'How unit prices are calculated' in this document.

Example: the Fund's performance exceeds the Performance Benchmark and overall the Fund's performance is positive

Daily performance fee calculation	How and when paid
<p>This example uses a unit price of \$1 for illustrative purposes only.</p> <p>For the period 1 January to 2 January we assume:</p> <ul style="list-style-type: none"> the investment amount is \$50,000 as at 1 January; the unit price increased from \$1.00 to \$1.02 (i.e. a 2% increase); the MSCI Emerging Markets Net Total Return Index (AUD) Unhedged return for the period was 1.5%; and no distributions were paid. <p>Performance benchmark per unit = \$1.00 + (1.5% x \$1.00) = \$1.015</p> <p>Fund outperformance per unit = \$1.02 – \$1.015 = \$0.005</p> <p>In this example, the Fund's performance (2%) has exceeded the Performance Benchmark (1.5%). The amount payable is calculated as follows.</p> <p>Performance fee per unit = \$0.005 x 15% = \$0.00075</p> <p>Total performance fee payable = \$0.00075 x 50,000 units = \$37.50</p> <p>Net asset value of investment amount as at 2 January = 50,000 units x \$1.02 = \$51,000</p> <p>The total performance fee of \$37.50 is accrued and reflected in the next day's unit price.</p>	<p>Accrued in the Fund's unit price the next day and deducted directly from the Fund after the end of the performance period.</p> <p>A performance fee will be payable.</p>

Example: the Fund's performance does NOT exceed the Performance Benchmark and overall the Fund's performance is positive

Daily performance fee calculation	How and when paid
<p>This example uses a unit price of \$1 for illustrative purposes only.</p> <p>For the period 1 April to 2 April we assume:</p> <ul style="list-style-type: none"> the investment amount is \$50,000 as at 1 April; the unit price increased from \$1.00 to \$1.01 (i.e. a 1% increase); the MSCI Emerging Markets Net Total Return Index (AUD) Unhedged return for the period was 1.5%; and no distributions were paid. <p>Performance benchmark per unit = \$1.00 + (1.5% x \$1.00) = \$1.015</p> <p>Fund underperformance per unit = \$1.01 – \$1.015 = –\$0.005</p>	<p>A performance fee will not be accrued in the unit price.</p> <p>The negative amount will be carried forward and will be used to offset against any positive performance fee amounts.</p>

Example: the Fund's performance does NOT exceed the Performance Benchmark and overall the Fund's performance is positive

Daily performance fee calculation	How and when paid
<p>In this example, the Fund's performance (1%) has underperformed the Performance Benchmark (1.5%). The amount to carry forward is calculated as follows:</p> <p>Performance fee per unit = $-\\$0.005 \times 15\% = -\\0.00075</p> <p>Total performance fee to be carried forward = $-\\$0.00075 \times 50,000 \text{ units} = -\\37.50</p> <p>Net asset value of investment amount as at 2 April = $50,000 \text{ units} \times \\$1.01 = \\$50,500$</p>	<p>A performance fee will not be payable. The negative amount will be offset against any future positive performance fee amounts.</p>

Transaction costs

Transaction costs are the costs associated with the buying and selling of the Fund's assets. These costs include brokerage, settlement costs, OTC derivative costs, clearing costs, stamp duty and other government taxes or charges and include underlying security buy/sell spreads and the transaction costs incurred to acquire or sell the underlying assets.

The total gross transaction costs incurred by the Fund for the last financial year were approximately 1.00% p.a. of the net asset value of the Fund, including the Responsible Entity's reasonable estimates where information was unavailable at the date of this PDS. The transaction costs shown in the 'Fees and costs summary' are net of any amount recovered by the buy/sell spread. The net transaction costs of the Fund (representing the total gross transaction costs minus the total amount recovered through the buy/sell spread of (+0.25%/-0.25%) incurred for the last financial year were 0.98% p.a. of the net asset value of the Fund, including the Responsible Entity's reasonable estimates where information was unavailable at the date of this PDS.

Transaction costs are not included in the management fees and costs. Instead they are paid from the assets of the Fund as and when they are incurred and therefore (where not otherwise recovered through the buy/sell spread) are an additional cost to you.

Total fees and costs

Based on the estimated costs outlined in this section, the estimated total of the amounts for management fees and costs, performance fees and net transaction costs is estimated as 2.28% p.a. of the net asset value of the Fund. The dollar figure of these estimated total

management fees and costs, performance fees and net transaction costs based on an investment balance of \$50,000 is \$1,140.

Buy/sell spreads

The buy/sell spread is a type of transaction cost that the Responsible Entity may charge to investors to recover some or all of the transaction costs of the Fund. The purpose of the buy/sell spread is to ensure that only those investors transacting in the Fund's units at a particular time bear the Fund's costs of buying and selling the Fund's assets as a consequence of their transaction.

The buy/sell spread for the Fund is stated as a percentage of the investment or withdrawal amount and is the difference between the investment unit price and the withdrawal unit price. It reflects an estimate of the transaction costs expected to be incurred in buying and selling the Fund's assets as a result of investments and withdrawals made by investors.

This estimate may take into account factors such as (but not limited to) historical transaction costs and anticipated levels of investments and withdrawals. It is expected that brokerage will make up the vast majority of transaction costs.

The current buy/sell spread of the Fund is +0.25%/-0.25%; however a different buy/sell spread may apply if the estimate changes.

We have discretion to waive or reduce the transactional and operational costs on investments or withdrawals where no or reduced costs are incurred. We will provide notification to unitholders of any changes to buy/sell spread transaction costs on the Fidante website.

Any difference between total gross transaction costs and the amounts recovered from the buy/sell spread from transacting investors is an additional cost that is borne by all investors of the Fund.

Please note that while the buy/sell spread is an additional cost to you, it is not a fee paid to us or Ox Capital. It is paid to the Fund and is reflected in the Fund's unit price.

Buy/sell spread example

- The current buy spread on an investment in the Fund is +0.25%. Therefore, the cost of an investment of \$50,000 into the Fund would be \$125.
- The current sell spread on a withdrawal from the Fund is -0.25%. Therefore, the cost on a withdrawal of \$50,000 from the Fund would be \$125.

Please note that this is just an example. In practice, actual transaction costs will depend on the amount you invest or withdraw.

Can fees be different for different investors?

Yes; we may negotiate, rebate, or waive fees for wholesale clients (as defined in the Corporations Act), where permitted by law. We do not negotiate fees with retail investors.

Borrowing costs

Borrowing costs are the costs associated with borrowing money or securities. The Fund may enter into borrowing facilities and, if so, the costs of a borrowing facility would be deducted from the Fund and not paid for by us from the fees we receive. Borrowing costs are not part of transaction costs, and are not shown in the 'Fees and costs summary'.

Government charges and GST

Government taxes such as stamp duty and Goods and Services Tax (**GST**) may apply to the Fund or your investment. Unless otherwise stated, all fees and costs are quoted inclusive of any GST and net of any input tax credits (**ITCs**) or reduced input tax credits (**RITCs**) that are expected to be available to the Fund.

Where RITCs are available, the prescribed rate is currently 55% or 75%, depending on the nature of the fee or cost incurred. Please refer to 'How managed investment schemes are taxed' for additional information on GST.

Other payments

We may pay fees from our resources to some platform operators because they make the Fund available through their investment service. These fees may be rebated to

the Indirect Investor investing in the Fund through the service or in some circumstances may be retained by the operator and include:

- for each platform operator, product access payments of up to \$20,000 p.a.; and/or
- where permitted by law, fund manager payments of up to 0.55% p.a. of the amount invested in the Fund.

These payments are made from our own resources so that they are not an additional cost to the Fund or its unitholders.

Maximum allowable fees

The Constitution allows certain maximum fees (see table below), and allows for expenses of the Fund (whether normal or abnormal expenses), such as registry, audit, taxation, advice, investment management and offer document costs to be paid directly from the Fund.

Fee	Maximum amount
Contribution fee (currently not charged)	5.00% of the contribution amount
Management fee (currently charged at 1.00% p.a.)	3.00% p.a. of the net asset value of the Fund
Withdrawal fee (currently not charged)	5.00% of the withdrawal amount
Performance fee (currently charged at 15% of the Fund's net return above its performance benchmark)	20% of the difference between the Fund's daily return (after fees and expenses and after adding back any distributions paid) and the performance benchmark (being the daily return of the MSCI Emerging Markets Net Total Return Index (AUD) Unhedged).
Switching fee (currently not charged)	Contribution fee plus \$50 (CPI adjusted)

The Constitution does not place any limit on the amount of the expenses that can be paid from the Fund.

Can fees change?

All fees can change without investor consent. Reasons for this might include changing economic conditions and changes in regulation. We will give unitholders 30 days' written notice of any proposed increase in fees. We cannot charge more than the Constitution allows. If we wish to raise fees above the amount allowed for in the Constitution, we would first need to obtain the approval of unitholders. We also reserve the right to waive or reduce any of the fees and costs described in this PDS without prior notice.

Indirect (or alternative form) remuneration

We may provide benefits to other financial services intermediaries where the law permits. If we do, we will provide these benefits from our own resources so that they are not an additional cost to the Fund or its unitholders.

We maintain a register (in compliance with the relevant regulatory requirements) summarising alternative forms of remuneration that are paid or provided to Australian financial services licensees and/or their representatives. Registers are publicly available and if you would like to review our register, please contact us.

Tax

Information about tax is set out in the 'How managed investment schemes are taxed' section.

Making, withdrawing and monitoring your investment

Each person should obtain and consider the Fund's PDS and TMD before making a decision about whether to acquire or continue to hold units in the Fund. A copy of the Fund's PDS and TMD can be obtained from your financial adviser, by calling the Fidante Investor Services Team on 1300 721 637, or at www.fidante.com. The information in the table below applies to Direct Investors only. If you are an Indirect Investor, you will need to comply with any requirements set by your platform operator. Please refer to 'Indirect Investors' for further information.

Please note that when making an investment, (whether initial or additional investments) the funds must come from an account held in your name. Similarly, withdrawals/distributions from your investment must also be paid to an account held in your name. Please note that 3rd party payments are not accepted.

	Minimum amounts ¹	How to lodge your request	More information
Initial investment	\$10,000	<p>You can invest in the Fund directly by following these two easy steps:</p> <ol style="list-style-type: none"> 1 Read and understand this PDS and TMD both available on our website or in hard copy on request; and 2 Complete and submit the online application form on our website by clicking "Invest Online". Please note paper application forms are available on our website or in hard copy on request. <p>Investments can be made from an account held in your name via direct debit, BPAY or electronic funds transfer. Additional information about making an investment

Initial Investments

When you make your initial investment in the Fund, we will email you a confirmation letter and log-in details to the secure online portal InvestorServe where you can manage your investment. Please refer to 'Keeping you informed' for more information.

Each person should obtain and consider the Fund's PDS and TMD before making a decision about whether to invest or continue to hold the Fund. A copy of the Fund's PDS and TMD can be obtained from your financial adviser, by calling the Fidante Investor Services Team on 1300 721 637, or at www.fidante.com.

Direct Investors

Details of how to make your initial investment are outlined in the 'Making, withdrawing, and monitoring your investment' table. Once you have made your initial investment in the Fund, you can make additional one-off investments and/or regular monthly investments via the Regular Investment Plan.

Indirect Investors

If you are an Indirect Investor you must complete the documentation which the platform operator requires. Please contact the relevant platform operator directly with any enquiries.

Additional one-off investments

Once you have made your initial investment in the Fund, you can make additional one-off investments and/or regular monthly investments via the Regular Investment Plan.

Each person should obtain and consider the Fund's PDS and TMD before making a decision about whether to make additional investments in the Fund. A copy of the Fund's PDS and TMD can be obtained from your financial adviser, by calling the Fidante Investor Services Team on 1300 721 637, or at www.fidante.com.

Direct Investors

Details of how to make your additional investment are outlined in the 'Making, withdrawing, and monitoring your investment' table.

Indirect Investors

If you are an Indirect Investor you must complete the documentation which the platform operator requires. Please contact the relevant platform operator directly with any enquiries.

Regular Investment Plan

The Regular Investment Plan (**RIP**) enables you to invest in the Fund each month via direct debit from a nominated account held in your name.

Direct Investors

You can set up an RIP via our online application process.

Your nominated account will be debited on or around the next business day after the 14th day of each month for the specified amount. Your application to commence an RIP must be received at least three business days before the 14th day of the month in which you wish your instructions to take effect. Participation in the RIP will be renewed annually by continuing to make contributions.

Units will be issued on the basis of information contained in the PDS and this document current at the time the contributions are made. Should a replacement PDS or additional important information be issued, we will notify you and inform you of any changes or updates if you continue to participate in the RIP. You can amend, suspend, or cancel your RIP at any time.

You should ensure that we receive your instructions to amend, suspend or cancel your RIP at least three business days before the 14th day of the month in which you wish your instructions to take effect. Any request received after this may result in the change not being effective until the following month.

If two consecutive debits are dishonoured due to insufficient funds, we will suspend your RIP.

Please ensure you have considered the Fund's PDS and TMD before making a decision about whether to set up an RIP. A copy of the Fund's PDS and TMD can be obtained from your financial adviser, the Fidante Investor Services Team on 1300 721 637, or at www.fidante.com.

Indirect Investors

RIP is not available to Indirect Investors.

Incomplete or rejected application forms

Under the Constitution, we can accept or reject any application for units and are not required to give any reason or grounds for such a refusal.

Monies from incomplete applications will generally be held on trust for a maximum period of 30 days in a non-interest bearing account commencing on the day we receive the monies. After this period, your funds will be returned to the source of payment.

Once we receive your completed application form, the monies held will be divided by the next determined unit price to calculate the number of units that will be allocated to you.

Customer Identification Program

Direct Investors

As part of the application process, we will electronically verify your identity (including, where applicable, the identity of any beneficial owners or related persons). If electronic verification can't be undertaken, we may ask you for additional identity verification documents and/or information.

In certain circumstances we may require the identity verification documentation to be certified.

Where the Application Form is signed under Power of Attorney we will also require a certified copy of the Power of Attorney document and a specimen signature of the attorney.

We may, where required, pass any information we collect and hold about you or your investment to the relevant government authority.

If any documentation requested by us is not in English, it must be accompanied by an original copy of an English translation prepared by an accredited translator.

If we do not receive all required valid customer identity verification information and/or documents, we will not be able to commence your investment. We will contact you as soon as possible if we require more information. We may also seek to re-verify your identity or collect additional information at any time after your investment has commenced.

Indirect Investors

Indirect Investors should refer to their platform operator for details of their customer identification program.

Additional information about withdrawing

How to make a withdrawal

Direct Investors

Direct Investors can request a withdrawal by lodging a Fidante Withdrawal Request Form or in writing. A withdrawal request, either in whole or in part, once received by us may not be withdrawn without our agreement. Withdrawals can only be made to an Australian bank account held in your name.

We will require the following information when you make your withdrawal request:

- your account number;
- the full name(s) in which your investment account is held;
- the amount (dollars or units) you wish to withdraw;
- method of payment; and
- a daytime telephone number.

If you originally invested via direct debit and you make a withdrawal within the first three months of making your investment, we will only pay the withdrawal proceeds to the account that was debited when making your initial investment.

Indirect Investors

You must complete the withdrawal documentation required by the platform operator.

Processing your withdrawal

While withdrawals are normally processed and paid within five business days of receiving your valid withdrawal request, we may take significantly longer than this in certain circumstances (please refer to 'Delay of withdrawal payments').

For Direct Investors, we can make withdrawal payments by direct credit to your nominated account. You agree that if the type of payment you request results in bank fees being charged, we may deduct those fees from your withdrawal proceeds before remitting the net amount to you.

Generally, if the payment for your withdrawal is returned to us and remains outstanding for 1 month, we may reinvest the proceeds in the Fund. Any reinvestment of a withdrawal amount will be processed using the investment unit price current at the time of the reinvestment transaction. For more information on unit prices, refer to 'How unit prices are calculated' below.

We may determine that some or all of the withdrawal amount consists of income (which may include net capital gains), rather than capital of the Fund.

We will advise you when this is the case as soon as practicable after the end of the financial year in which the withdrawal occurred.

We have the discretion to transfer assets referable to the Fund to you (instead of cash) in payment (partly or fully) of the proceeds of your withdrawal request less any costs for the transfer.

We have the right to compulsorily redeem units in issue, if we give at least 30 days prior written notice to affected investors.

Delay of withdrawal payments

Withdrawals are normally processed and paid within five business days of receiving a valid withdrawal request; however, we do not guarantee this timeframe and we may take significantly longer to pay withdrawals in certain circumstances.

Withdrawals may be delayed in the following circumstances:

- under the Constitution, we have 21 days to satisfy a valid withdrawal request;
- under the Constitution, we can suspend withdrawals for up to 60 days (refer to 'Suspending withdrawals' below);
- we can also spread withdrawal payments, generally over four months (refer to 'Spreading withdrawals' below); or
- if the Fund becomes illiquid, we are not required to pay withdrawals unless we offer to do so in accordance with the Corporations Act (refer to 'If the Fund becomes illiquid' below).

Where multiple delays are applicable, timeframes may apply cumulatively.

Additionally, if we did not receive all required identity verification documents at the time of investment or your withdrawal request is incomplete, we may not process your withdrawal request until these documents are received or further requirements are met.

Suspending withdrawals

We may suspend withdrawal requests for up to 60 days where:

- it is impracticable for us or we are unable to calculate the Fund's net asset value (and hence unit prices) for example because of:
 - an inability to value the assets of the Fund due to (without limitation) closure of, or trading restrictions or suspensions on, stock, commodities, futures or securities exchanges, or over-the-counter market on which any significant portion of the assets of the Fund are listed, quoted, traded or dealt, or due to an emergency, natural disasters, acts of terrorism, insurrection, civil disorder, war, military operations or other state of affairs, or on declaration of a moratorium in a country where the Fund invests (or the Fund has exposure through any assets of the Fund (including any derivative) in which the Fund invests) or under the Corporations Act;

- we reasonably estimate that we must sell 5% or more (by value) of all the Fund's assets to meet withdrawals;
- there have been, or we anticipate there will be, withdrawal requests that will require us to realise a significant amount of the Fund's assets that would be disadvantageous to remaining investors (such as placing capital gains tax burden on remaining investors or resulting in a material diminution in the value of the assets of the Fund);
- we reasonably consider it to be in the interests of investors to do so;
- where the Fund or a class is quoted, the units or units in that class is suspended or the trading of any units or units in a class is otherwise halted, interrupted or restricted by the ASX, or the trading of any units or units in a class on the ASX is subject to a period of deferred settlement trading, or there is a period which units are subject to a consolidation or division;
- where the Fund or a class is quoted, units or units in a class cease to be quoted; or
- the law otherwise permits.

Any withdrawal requests received during a period of suspension, or for which a unit price has not been calculated or confirmed prior to the commencement of a period of suspension, will be deemed to have been received immediately after the end of the suspension period.

Spreading withdrawals

Under the Constitution, we may, if we consider it to be fair to all unitholders, spread the redemption of some or all of the relevant units across more than one redemption date. Generally, we may spread a withdrawal request where:

- we receive a withdrawal request for the value of 5% or more of the number of units on issue;
- we receive, on any day, withdrawal requests that in total represent 10% or more of the number of units on issue;
- there have been, or we anticipate that there will be, withdrawal requests for 10% or more of the total units on issue in the Fund and we consider that if those requests are met rapidly this may either place a disproportionate expense or capital gains tax burden on remaining investors or meeting the requests would impact negatively on the price we could achieve in selling Fund assets or otherwise disadvantage remaining investors.

When we spread withdrawals, we may determine that a withdrawal request is four separate requests, each for a quarter (or as close to a quarter as we determine) of the total number of units in the original withdrawal request.

Each of the four (deemed) withdrawal requests will be deemed to be received by us on the same business day of the month (or next business day, if not a business day or if that day does not occur in that month) in each of the four succeeding months following the original withdrawal request.

If the Fund becomes illiquid

If the Fund is not liquid (as defined in the Corporations Act), unitholders will only be able to withdraw from the Fund if we make an offer of withdrawal to unitholders. If we do make such an offer, unitholders may only be able to withdraw part of their investment. There is no obligation for us to make withdrawal offers.

Under the Corporations Act, the Fund is regarded as liquid if liquid assets account for at least 80% of the value of the assets of the Fund. Liquid assets generally include money in an account or on deposit with a bank, bank-accepted bills, marketable securities and property of the kind prescribed under the Corporations Act.

As at the date of this PDS, the Responsible Entity expects that the Fund will be liquid.

Additional information about transactions

Transferring ownership

Direct Investors

You can generally transfer some or all of your investment to another person in such a manner and subject to such conditions as required by law and that we, from time to time, prescribe. We are not obliged to register a transfer that does not meet these criteria, or where there is an amount payable to us by the transferee or the transferor (as applicable) in respect of the units being transferred. We recommend that you obtain your own professional advice regarding your position before transferring some or all of your investment, as tax and social security laws are complex and subject to change, and investors' individual circumstances vary.

Please contact us for further information about transferring units.

Indirect Investors

Contact the platform operator if you wish to transfer your units.

Transaction cut-off times

Direct Investors

Generally, if your valid investment or withdrawal request is received in our Sydney office before 3:00pm Sydney time on a New South Wales business day (referred to as the transaction cut-off time), it will usually be processed using the unit price determined as at the close of business on that day. If your valid investment or withdrawal request is received after the transaction cut-off time, or on a non-business day, it will usually be processed using the applicable unit price calculated as at the close of business on the next business day.

Indirect Investors

You should contact your IDPS operator for information regarding transaction cut-off times.

Online transacting terms and conditions

Direct Investors

You should understand that a person without your authority could login to your account via InvestorServe and, by pretending to be you, make changes to your account.

We take care when acting on instructions. In doing so, we have in place internal policies and procedures designed to reduce the risk that fraud may be committed in relation to your account. We currently only allow withdrawals to be made via the Fidante Withdrawal Request Form or in writing.

In using the online transacting facility, you agree that we are not responsible to you for any fraudulently completed communications and that we will not compensate you for any losses if we have complied with internal policies and procedures, and we have not been negligent, fraudulent or dishonest.

We will only act on completed communications that we receive.

If the details of the bank account quoted at the time of making a withdrawal do not match the nominated bank account we have on file, the withdrawal will not proceed. You can change your bank account details online via InvestorServe or in writing. If you lodge a withdrawal request within 90 days of changing your bank account on file, we will follow up with a call before processing the request.

We may cancel or vary these requirements by giving you notice in writing.

Indirect Investors

You should contact the platform operator for information regarding how to transact.

Changes to permitted transactions

We can vary the minimum investment amounts for the Fund at any time and can also change the application or withdrawal transaction cut-off time. Under the Constitution, we can refuse applications for any reason. Where we consider it to be in the interests of unitholders (such as an inability to value the Fund), we may suspend application or withdrawal requests. Any application or withdrawal requests received during the period of suspension, or for which a unit price has not been calculated or confirmed prior to the commencement of a period of suspension, will be deemed to have been received immediately after the end of the suspension period.

Keeping you informed

You can access your account information through the secure online access system InvestorServe, which is available 24 hours a day, 7 days a week. InvestorServe is a secure online service which provides access to up-to-date information about your investments.

Through InvestorServe you can:

- view your account balances and transaction histories;
- view all confirmations and statements relating to the Fund and your investment (this includes distribution and tax statements, transaction confirmations) ;
- view your quarterly periodic statement;
- view and change your contact details including banking details and distribution payment preference;
- select the way you would prefer us to communicate with you; and
- if applicable, set up, modify or cancel your Regular Investment Plan.

At any time, you may request a paper copy of any statement or confirmation by calling the Fidante Investor Services Team on 1300 721 637. We recommend that you check all statements and transaction confirmations carefully. If there are any discrepancies, please contact us or your financial adviser.

Indirect Investors

Please contact the platform operator for information regarding your investment in the Fund.

Keeping us informed

Direct Investors

Our records about you are important.

Please ensure your personal details on your account are up to date. You can update these details via InvestorServe at any time. This includes a new postal address, a change of name or new bank account details. We will send you confirmation of any changes that you request us to make to your personal details.

Indirect Investors

As an Indirect Investor, you should notify the platform operator of any changes to your personal details.

What happens if you choose not to disclose certain information?

If you choose not to disclose certain information, the following may apply:

- Account details: we will not be able to pay withdrawal proceeds or income distributions to you.
- Tax residency information: we may not be able to process your request, or we may be required to notify the ATO.
- Incomplete application form: unless otherwise agreed, we will not be able to process your investment request.
- If you do not provide all relevant identity verification documents, we will not be able to process your investment request.

For Australian resident investors, if you choose not to disclose your TFN, TFN exemption or ABN, we may have to deduct tax at the highest marginal tax rate plus Medicare levy (and any other levies we are required to deduct, from time to time) from any amounts attributed or distributed to you (refer to 'Tax File Number' in 'How managed investment schemes are taxed').

Up-to-date information about the Fund

You can obtain up-to-date Fund performance, actual asset allocations and Fund size information from the Fund's regular report available at www.fidante.com.

A paper copy of any updated information will be given to you, without charge, on request by contacting us.

If the Fund is a "disclosing entity" under the Corporations Act, it will be subject to regular reporting and disclosure obligations. Copies of documents lodged with the Australian Securities and Investments Commission (ASIC) in relation to the Fund may be obtained from, or inspected at, an ASIC office.

You can obtain copies of the Fund's most recent annual financial report by visiting the Fidante website. A paper copy of the Fund's annual financial reports, any

continuous disclosure notices, and any half yearly financial report will also be given to you, without charge, on request.

As Responsible Entity of the Fund, we may be subject to continuous disclosure obligations that require us to make material information available to investors. You can obtain a copy of the Fund's continuous disclosure information by visiting the Fidante website.

How to exercise cooling-off rights

The repayment of your investment under the cooling-off right is subject to an adjustment for market movements (both positive or negative) during the period in which the investment has been held. We may also deduct a reasonable charge for our administration costs.

Direct Investors

If you are a Direct Investor and you wish to exercise the cooling off rights, we must receive your written instructions at our office before the expiry of the cooling-off period. This cooling-off right must be exercised within 14 days from the earlier of:

- when you receive confirmation of your investment; or
- the end of the fifth business day after the day on which your units were issued or sold to you.

Indirect Investors

If you are an indirect investor, you should seek advice from your financial adviser or platform operator about the cooling-off rights (if any) that might apply to your investment in or through the platform.

Wholesale clients

These cooling-off rights do not apply to wholesale clients (as defined in the Corporations Act). Please note that as an investor in the Fund you will not necessarily be a wholesale client for the purposes of the Corporations Act.

Additional information about making a complaint

As part of our commitment to providing quality service to our Investors, we endeavour to resolve all complaints quickly and fairly. Our policy is to acknowledge any complaint within 24 hours or as soon as practical after receiving it and investigate, properly consider, and decide what action (if any) to take and to provide a final response to you within 30 calendar days for standard complaints. If you have a particular complaint regarding your investment, please do not hesitate to contact us by calling the Fidante Investor Services Team on 1300 721 637 or by writing or emailing to:

Complaints and Disputes Resolution Officer

C/- Fidante
GPO Box 3993
Sydney NSW 2001

E: info@fidante.com.au

If you are not satisfied with our response or how the complaint has been handled (or we have not responded within 30 days) you may contact the following external dispute resolution scheme.

The Australian Financial Complaints Authority (AFCA)

GPO Box 3
Melbourne VIC 3001
Tel: 1800 931 678
www.afca.org.au

email: info@afca.org.au

AFCA provides fair and independent financial services complaint resolution that is free to consumers.

New Zealand investors must send all complaints in writing to the Financial Markets Authority, New Zealand.

Indirect Investors may either contact the platform operator or us with complaints relating to the Fund. Complaints regarding the operation of the platform should be directed to them. If a complaint is first raised with the platform operator and an Indirect Investor is not happy with how the complaint has been handled, the Indirect Investor will need to raise that with the platform operator or the platform operator's external dispute resolution service.

How managed investment schemes are taxed

The Australian tax commentary below is of a general nature and is based on our understanding of the Australian tax laws, as at the date of this document, as they relate to Australian resident individual taxpayers who hold their investment on capital account. It does not take into account the Australian or New Zealand tax treatment of New Zealand resident taxpayers. Any information contained therein should be used as a guide only and does not constitute professional taxation advice as individual circumstances may differ. Fidante is not a registered tax (financial) adviser and is not licensed or authorised to provide tax advice. We recommend that you obtain your own professional advice regarding your position, as tax and social security laws are complex and subject to change, and investors' individual circumstances vary.

Taxation of the Fund

The Attribution Managed Investment Trust (**AMIT**) legislation applies to qualifying Managed Investment Trusts (**MITs**) that make an irrevocable election to become an AMIT. The Responsible Entity has elected for the Fund to be an AMIT.

An AMIT must attribute its taxable income to investors on a fair and reasonable basis, and investors are advised of their share of the taxable income via an AMIT Member Annual Statement (**AMMA Statement**). The Fund will generally not be liable to pay income tax on its taxable income on the basis that it will attribute all determined trust components (i.e. assessable income, exempt income and non-assessable non-exempt income) to members each year. If the Fund were to cease being an AMIT, it should also generally not be liable to pay income tax on the basis that unitholders are presently entitled to the Fund's distributable income.

Other key features of the AMIT regime include: income character retention; deemed fixed trust status; an ability for adjustments and errors at the trust level to be carried forward and dealt with in the year in which they are discovered; adjustments (upwards and downwards) made to investors' cost bases for CGT purposes, and their costs for revenue purposes, where there are differences between the amount distributed and the amount attributed on an AMMA Statement; and clarification of the treatment of tax deferred distributions.

The MIT capital account election regime permits eligible MITs to make an irrevocable election to adopt capital account treatment for certain types of assets (broadly shares, units and real property) for income years to which the election applies. An irrevocable election has been made in respect of the Fund and accordingly deemed

capital treatment will apply in respect of the qualifying assets for the income years to which the election applies.

Additionally, there is arm's length income legislation that applies to MITs. Under this legislation, excess income generated by a MIT from non-arm's length arrangements may be determined to be subject to tax at 30%. It is not expected that the arm's length income provisions will impact the Fund.

The Taxation of Financial Arrangement (**TOFA**) provisions apply on a mandatory basis to qualifying taxpayers in respect of certain financial arrangements. Broadly, the TOFA provisions recognise certain gains and losses on financial arrangements on an accruals basis, which may result in a taxing point prior to the realisation of the investment. As at the date of this document, we, as Responsible Entity of the Fund, have not made an election to apply one of the elective methods under TOFA.

Tax losses incurred by the Fund will remain in the Fund and can be applied to reduce the Fund's income in future years (subject to the Fund satisfying the specific provisions of the trust loss carry forward legislation).

Tax position of Australian resident investors

You will generally be required to include in your assessable income your attributed income of the Fund. There may be instances where your attributed share of the taxable income of the Fund exceeds the distribution you receive from the Fund.

Where investors disagree with the allocation of taxable income in an AMMA Statement, they may give a 'member choice' to the Commissioner of Taxation. In the event investors make a member choice, the Constitution provides that the investors will indemnify us for all costs and liabilities incurred as a result of the member choice.

CGT cost base reductions or uplifts may occur where taxable income attributed is either less than or greater than, respectively, the total of both cash distributed and tax offsets attributed for an income year. Where cost base reductions or uplifts occur, this will affect the CGT position of the investment. For those investors who have a zero cost base in their units, or where the total cost base reduction amount exceeds the cost base of their units, a capital gain may arise to these investors for that year. Investors should maintain records of their cost base adjustments. You may also be entitled to tax offsets (franking credits and/or foreign tax offsets) attributed by the Fund. Provided investors satisfy certain provisions of the Tax Act, investors may be able to utilise these offsets against their tax liability on the taxable

components of the distributions. In order to claim the amount of tax offsets, investors must include the amount of the offsets in their assessable income.

We will advise each investor of their share of tax offsets in the AMMA Statement.

The disposal of units (for instance by withdrawal or transfer) may give rise to a capital gains tax liability or a capital loss. Investors who have held their units on capital account for more than 12 months may be entitled to a capital gains tax discount.

Non-resident account holder reporting requirements

As a result of an increased international focus on account holder data exchange, a number of countries have legislated that financial institutions (which includes us) identify and report certain information about the financial accounts of investors. The regimes include the United States Foreign Account Tax Compliance Act (**FATCA**) and the OECD's Common Reporting Standard (**CRS**). To comply with our obligations under various reporting legislation we will provide to the ATO such data as required in respect of your investment with us. This will be required if you are a US citizen or a foreign tax resident of any jurisdiction outside of Australia. If we have attempted to confirm your tax status with you but have been unable to do so, we may still be required to notify the ATO.

Goods and Services Tax (GST)

GST is not payable on the issue, withdrawal or transfer of units in the Fund, as these are input-taxed financial supplies for GST purposes. However, GST will generally be incurred on various acquisitions made by the Fund, including the acquisition of investment management services. In certain specified circumstances, the Fund may be entitled to input tax credits (**ITCs**), or reduced input tax credits (**RITCs**) at the prescribed percentage of 55% or 75% depending on the acquisition. Any available ITCs or RITCs effectively reduce the non-recoverable GST cost incurred.

Tax file number

On your application form you may provide us with your Tax File Number (**TFN**), or TFN exemption. Alternatively, if you are investing in the Fund in the course of an enterprise, you may quote an Australian Business Number (**ABN**). It is not compulsory for you to quote a TFN, exemption or ABN, but if you do not, we are required to deduct tax from your attributed or distributed amounts at the highest marginal tax rate plus the Medicare levy (and any other levies we are required to deduct, from time to time). The collection of TFNs is authorised, and their use is strictly regulated, by tax and

privacy laws. Non-residents are generally exempt from providing a TFN, however may be required to provide other information.

Additional information

How unit prices are calculated

Unit prices are determined in accordance with the Constitution and are usually calculated each NSW business day. The calculation of both the investment unit price and the withdrawal unit price is based on the net asset value (**NAV**) adjusted by the buy/sell spread. For information on buy/sell spreads, refer to 'Buy/sell spreads' in 'Additional explanation of fees and costs'.

For investment and withdrawal unit prices, the NAV is the value of all the Fund's assets attributed to the Fund less the value of the Fund's liabilities at the valuation time. When calculating the NAV, we must use the most recent valuations of the Fund's assets and the most recent determination of the liabilities. Where more than one class is on issue, the investment and withdrawal prices will be calculated for the relevant class using the NAV that is referable to that particular class.

The Fund's assets and liabilities are usually valued each NSW business day.

Generally, for unit pricing purposes, listed securities are valued using the last available market close price quoted on the relevant exchange. Other assets are generally valued at recoverable value. Any income entitlements, cash at bank, and any amount of Goods and Services Tax (**GST**) recoverable by the Fund from the Australian Taxation Office are also included in asset values used to calculate the investment and withdrawal unit prices.

Generally, for unit pricing purposes, liabilities are valued at cost. Liabilities also include an accrual for management costs (which includes management fees up to and including the calculation date and a performance fee if payable up to the date before the calculation date) and for costs (if any) that an investor would ordinarily incur when investing in the Fund's underlying assets.

Where we receive a valid transaction request before the transaction cut-off time of 3:00pm (Sydney time) on a NSW business day, the unit price will generally be determined at the next valuation time after that transaction cut-off time. This is typically referred to as 'forward pricing'.

In rare circumstances, we may suspend unit pricing where, acting in accordance with our Responsible Entity obligations to unitholders, we consider it impracticable to calculate a NAV.

We have a Unit Pricing Permitted Discretions Policy. The policy sets out how we will exercise any discretions in relation to unit pricing (such as, for example, how often we determine unit prices and valuation methodology). If

we depart from our policy, we are also required to record details of this departure. You can obtain a copy of this policy or any recorded departures free of charge by calling us.

Additional information about distributions

If we pay a distribution, as a Direct Investor you may choose to have your distribution reinvested in additional units in the Fund, or paid directly to your nominated account with an Australian financial institution. Unless you have indicated otherwise, we will reinvest your distributions.

As an Indirect Investor you should contact your IDPS operator for distribution payment or reinvestment options.

The price of units issued on reinvestment of distributions is the investment price for units next determined after the close of business on the last day of the distribution period. There is no buy/sell spread reflected in this investment price. The amount of each distribution may vary. Your share of any distribution depends on how many units you hold at the end of the relevant period as a proportion of the total number of units in the relevant class on issue at that time and the amount of distributable income referable to those units and that class.

As distributable amounts are a component of the unit price, unit prices normally fall by the distribution amount following a distribution.

The amount of income distributed each year will generally be the distributable income received by the Fund, unless we decide to distribute a different amount. Any net capital gains derived by the Fund during the financial year are generally distributed in the June distribution period.

If you invest just prior to a distribution payment, you may receive some of your investment back immediately as income. Conversely, if you withdraw from the Fund just before a distribution, you might turn income into a capital gain or reduce your capital losses.

Under the Constitution, we have the power to make reinvestment of distributions compulsory. At the date of this document, we have no intention of introducing compulsory distribution reinvestment. We have the discretion to transfer assets of the Fund to you (instead of cash) in payment (partly or fully) for a distribution amount.

Generally, if any distribution payments are returned to us and remain outstanding for 1 month, we may reinvest those distributions and amend your future distribution method to reinvest.

Generally, if any distribution payments made by electronic transfer of funds is unsuccessful three times, the money may be reinvested and your future distribution payment method will be updated to re-invest.

Any reinvestment of an unclaimed or returned distribution will be processed using the investment unit price current at the time of the reinvestment transaction.

If you wish to change your distribution payment instructions, please follow the process outlined below.

Direct Investors

Please log into InvestorServe to update your details.

Indirect Investors

Please contact your platform operator for the documentation required.

How the Fund is governed

The Constitution, together with the Corporations Act and other laws, governs the way in which the Fund operates, including the rights, responsibilities and duties of the Responsible Entity and unitholders.

The Constitution

The Constitution contains the rules relating to a number of issues including:

- unitholder rights;
- the process by which units are issued and redeemed;
- the calculation and distribution of income;
- the investment powers of the Responsible Entity;
- the Responsible Entity's right to claim indemnity from the Fund and charge fees and expenses to the Fund;
- the creation of other classes of units; and
- the termination of the Fund.

The Constitution allows for different classes of units to be established (this includes reclassifying a class as being the same as another class).

The Constitution also grants us the power to quote a class of units (including Class A Units) in the Fund on a Securities Exchange.

Subject to the terms of the Constitution, while a class is quoted, we may act as a market maker for the Fund to provide liquidity for the class of units quoted on a Securities Exchange and facilitate settlements on the Fund's behalf.

We will give unitholders 30 days' written notice of any proposed quotation of a class of units.

All rights, entitlements, obligations, assets, liabilities and calculations of a unit are referable to that class of units.

It is generally thought that unitholders' liabilities are limited to the value of their holding in the Fund. It is not expected that a unitholder would be under any obligation if a deficiency in the value of the Fund was to occur. However, this view has not been fully tested at law.

Unitholders can inspect a copy of the Constitution at our head office or we will provide a copy free of charge, on request.

We may alter the Constitution if we reasonably consider the amendments will not adversely affect unitholders' rights. Otherwise (subject to any exemption under the law), we must obtain unitholder approval at a meeting of unitholders.

We may retire or be required to retire as Responsible Entity if unitholders pass a resolution approving our removal.

Termination

The Constitution, together with the Corporations Act, governs how and when the Fund may be terminated. We may terminate the Fund at any time by written notice to unitholders. On termination, a unitholder is entitled to a share of the net proceeds of our realisation of the assets in proportion to the number of units they hold in the Fund.

Unitholder meetings

The conduct of unitholder meetings and unitholders' rights to requisition, attend and vote at those meetings are subject to the Corporations Act and (to the extent applicable) the Constitution.

Compliance plan and compliance committee

We have lodged the Fund's compliance plan with ASIC and established a compliance committee for the Fund with a majority of external members. The compliance plan sets out how we will ensure compliance with both the Corporations Act and the Constitution.

The compliance committee's role is to monitor compliance with the compliance plan. It must also regularly assess the adequacy of the compliance plan and report any breaches of the Corporations Act or the Constitution to us. If we do not take appropriate action to deal with the breach, the compliance committee must report the breach to ASIC.

The Fund and the compliance plan are required to be audited annually.

Other parties

We have engaged a third party registry provider that is responsible for maintaining the register of unitholders which includes all details of an investor's account and investments. The registry provider is responsible for sending all correspondence related to unitholders investments as well as providing customer service support.

In addition we have also appointed a third party custodian to hold the assets of the Fund. The custodian has no independent discretion with respect to the holding of assets and is subject to performance standards.

We have also appointed a registered company auditor. The auditor's role is to provide an audit of the financial statements of the Fund each year, as well as performing a half-yearly review (if required), and to provide an opinion on the financial statements.

Other important information

Indirect Investors

Investors accessing the Fund through platforms that are an IDPS or IDPS like scheme do not become unitholders in the Fund, nor do they acquire the rights of a unitholder. It is the platform operator that acquires those rights and can exercise or decline to exercise them on behalf of Indirect Investors.

To invest, Indirect Investors need to complete the documentation which their platform operator requires. Before investing please ensure you read and understand the Fund's PDS and TMD as well as the platform operator's documentation as that explains their services and fees.

Please contact the relevant platform operator directly with any enquiries.

New Zealand Investors

This offer to New Zealand investors is a regulated offer made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act 2001 (Cth) (Aust) and regulations made under that Act. In New Zealand, this is subpart 6 of Part 9 of the Financial Markets Conduct Act 2013 and Part 9 of the Financial Markets Conduct Regulations 2014. Please refer to 'Important Information for New Zealand Investors'.

Privacy

We collect personal information from you and, if relevant, from your financial adviser. We may take steps to verify the information collected. Where you provide us with personal information about someone else (for example, your power of attorney, or related persons including the beneficial owners connected with your investment) you must have their consent to provide their personal information to us.

We will use your personal information to:

- process your application;
- provide and administer your investment and send you information;
- improve and personalise our products and services;
- conduct product and market research;
- inform you about other products and services that may be useful to you; and
- comply with our obligations under the law, including with respect of anti-money laundering, financial services and taxation laws.

If you decide not to provide certain information, we may not be able to process your investment or future withdrawal requests, or will have to deduct tax from any amounts attributed or distributed to you at the highest marginal tax rate plus the Medicare levy (and any other levies we are required to deduct, from time to time).

Disclosing your information

We disclose your information to your financial adviser. In addition, we may disclose information we hold about you:

- if you consent to the disclosure;
- if the disclosure is required or authorised by law;
- to our appointed registry services provider or organisations acting on our behalf (for example, external mail houses we may use to mail correspondence);
- to professional service firms that provide services to us such as legal and audit services, or data or information services;
- to related companies and/or the investment manager that may also provide you with a financial product or financial service;
- to electronic identity verification service providers, in order for identity information (about you or related persons connected with your investment) to be verified against relevant government and other databases, for the purpose of complying with anti-money laundering laws;

- in some circumstances, to digital service providers, such as Facebook, Google and LinkedIn, to develop a better understanding of our current and prospective customers and advisers (please refer to the Privacy Policy for additional information); or
- otherwise in accordance with our Privacy Policy.

From time to time we or our related companies may contact you to tell you about other products and services that might be useful to you, including financial, superannuation, investment, insurance and funds management products and services. Please contact us if you do not want to receive any of this kind of marketing material.

For information on how you can correct or update the personal information we hold about you refer to 'Keeping us informed' in this PDS and our 'Privacy Policy' available at www.fidante.com and our third party registry providers privacy policy for more information.

Our Privacy Policy contains further details about our handling of personal information and about how you can request access to it or lodge a complaint if you believe your personal information has been misused, and how we deal with complaints.

We do not normally receive any personal information about you when you invest in the Fund through a platform operator. For details on the collection, storage and use of personal information by a platform operator you should contact them directly. The information we collect and store from platform operators is used to establish and administer its investments. If we do receive any personal information we will deal with it in accordance with our Privacy Policy.

About the service providers

About the Custodian

The Fund has appointed Citibank N.A., Hong Kong Branch (**Citi**) as Custodian for the Fund. These services may include the provision to the Fund of settlement and foreign exchange facilities.

Certain assets of the Fund will, subject to the following paragraph, be held by the Custodian in segregated accounts. Such assets will not be mixed with the property of the Custodian and should not be available to third party creditors of the Custodian in the event of insolvency of the Custodian. However, the assets of the Fund held by a Custodian will be subject to a charge to secure the Fund's obligations.

The Custodian will provide custody services for the assets of the Fund (including documents of title or certificates evidencing title to investments). The Custodian may appoint sub-custodians. The Fund may

remove Citi as the Custodian and appoint another custodian in its place at any time without notice to investors.

The Custodian will not be liable for any loss to the Fund resulting from any act or omission in relation to the services provided under the terms of the custody agreements unless such loss results directly from the negligence, wilful default, dishonesty or fraud of the Custodian or its employees, officers or directors.

The Custodian is a service provider to the Fund and is not responsible for the preparation of this document or the activities of the Fund and therefore accepts no responsibility for any information contained in this document, other than those parts that refer to it. The Custodian will not participate in the investment decision-making process for the Fund.

Citi has provided its consent to the statements about it in the form and context in which they are included. Citi was not involved in the preparation and distribution of this document and not responsible for the issue of this document, nor is it responsible for any particular part of this document. Citi has not withdrawn its consent before the date of this document.

Important information for New Zealand investors

This offer to New Zealand investors is a regulated offer made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act and regulations made under that Act. In New Zealand, this is subpart 6 of Part 9 of the Financial Markets Conduct Act 2013 and Part 9 of the Financial Markets Conduct Regulations 2014.

This offer and the contents of the offer document are principally governed by Australian rather than New Zealand law. In particular, the Corporations Act and the regulations made under that Act set out how the offer must be made.

There are differences in how financial products are regulated under Australian law. For example, the disclosure of fees for managed investment schemes is different under the Australian regime.

The rights, remedies, and compensation arrangements available to New Zealand investors in Australian financial products may differ from the rights, remedies, and compensation arrangements for New Zealand financial products.

Both the Australian and New Zealand financial markets regulators have enforcement responsibilities in relation to this offer. If you need to make a complaint about this offer, please contact the Financial Markets Authority,

New Zealand (<http://www.fma.govt.nz>). The Australian and New Zealand regulators will work together to settle your complaint.

The taxation treatment of Australian financial products is not the same as for New Zealand financial products.

If you are uncertain about whether this investment is appropriate for you, you should seek the advice of an appropriately qualified financial adviser.

This offer may involve a currency exchange risk. The currency for the financial products is not New Zealand dollars. The value of the financial products will go up or down according to changes in the exchange rate between that currency and New Zealand dollars. These changes may be significant.

If you expect the financial products to pay any amounts in a currency that is not in New Zealand dollars, you may incur significant fees in having the funds credited to a bank account in New Zealand dollars.

The dispute resolution process described in this offer document is available only in Australia and is not available in New Zealand.

Glossary

Investment term	Explanation
active management	A style of investment management that seeks to attain returns through active asset allocation and security selection within each asset class rather than by tracking an index.
Constitution	The constitution of the Ox Capital Dynamic Emerging Markets Fund, as amended from time to time.
convertible securities	A debt security that can be converted into shares at the option of the holder or the issuer.
derivatives	Derivatives are a contract between two or more parties with a value based on an underlying asset. The value of derivatives generally is derived from the performance of an asset, index, interest rate, commodity, or currency. Generally derivative contracts are used to manage the risk associated with buying, selling, or trading assets with fluctuating prices. Futures, options and swaps are all types of derivative contracts.
futures	An agreement between two parties to buy or sell a specified quantity of a specified underlying asset, at a particular time in the future and at a price agreed when the agreement is made.
participation note	A derivative instrument generally used to gain economic exposure to underlying assets such as shares.
partly paid shares	Where the full price for the share (par value) was not paid when the share was acquired. The issuing company can make a 'call' when it requires the remaining amount to be paid.
preference shares	A preference share is a share with dividends that are paid to shareholders before stock dividends are paid out. Preference share shareholders usually do not have voting rights.
option	An agreement between two parties that conveys the right, but not the obligation, to the holder of the option to either buy or sell a specific asset at an agreed price and within an agreed period of time. If the option is not exercised during that time, the money paid for it is forfeited.
short selling	An investment technique whereby the Fund takes a short position in a market or stock (via swaps). If the market or stock drops in price, the Fund will benefit, as the price it entered into the short position is higher than the current price. If the price rises, the Fund will make a loss as the price it entered into the short position is lower than the current price.
swap	A contract between two parties to exchange an agreed stream of future cash flows for another.
volatility	The extent of fluctuations in share prices, exchange rates and interest rates. The higher the volatility, the less certain an investor is of the return, and therefore volatility is one measure of risk.
warrant	Similar to an option, it is an agreement between two parties that conveys the right, but not the obligation, to the holder of the option to either buy or sell a specific asset at an agreed price and within an agreed period of time. However, a warrant is issued by the company itself (the company will be one party to the transaction), and therefore when the warrant is exercised the transfer of shares is between the investor and the company.
