Index Definitions and Important Index Disclosure

Indices are provided for illustrative purposes only and not indicative of any investment. They have not been selected to represent appropriate benchmarks or targets for the strategy. Rather, the indices shown are provided solely to illustrate the performance of well-known and widely recognised indices. Any comparisons herein of the investment performance of a strategy to an index are qualified as follows: (i) the volatility of such index will likely be materially different from that of the strategy; (ii) such index will, in many cases, employ different investment guidelines and criteria than the strategy and, therefore, holdings in such strategy will differ significantly from holdings of the securities that comprise such index and such strategy may invest in different asset classes altogether from the illustrative index, which may materially impact the performance of the strategy relative to the index; and (iii) the performance of such index is disclosed solely to allow for comparison on the referenced strategy's performance to that of a well-known index. Comparisons to indices have limitations because indices have risk profiles, volatility, asset composition and other material characteristics that will differ from the strategy. The indices do not reflect the deduction of fees or expenses. You cannot invest directly in an index. No representation is being made as to the risk profile of any benchmark or index relative to the risk profile of the strategy presented herein. There can be no assurance that the future performance of any specific investment, investment strategy, or product will be profitable, equal any corresponding indicated historical performance, or be suitable for a portfolio.

- **The Bloomberg AusBond Bank Bill Index** is engineered to measure the Australian money market by representing a passively managed short-term money market portfolio. This index is comprised of 13 synthetic instruments defined by rates interpolated from the RBA 24-hour cash rate, 1M BBSW, and 3M BBSW.
- **The Credit Suisse Institutional Leveraged Loan Index (“CSLLI”)** is designed to mirror the investable universe of the \$US-denominated leveraged loan market. The index inception is January 1992. The index frequency is daily, weekly and monthly. New loans are added to the index on their effective date if they qualify according to the following criteria: 1) Loan facilities must be rated “5B” or lower. That is, the highest Moody’s/S&P ratings are Baa1/BB+ or Ba1/BBB+. If unrated, the initial spread level must be Libor plus 125 basis points or higher. 2) Only fully funded term loan facilities are included. 3) The tenor must be at least one year. 4) Issuers must be domiciled in developed countries; issuers from developing countries are excluded.
- **The ICE BofA US High Yield Index (“H0A0”)** tracks the performance of US dollar denominated below investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have a below investment grade rating (based on an average of Moody’s, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one year remaining term to final maturity as of the rebalancing date, a

fixed coupon schedule and a minimum amount outstanding of \$100 million. Index constituents are capitalization-weighted based on their current amount outstanding times the market price plus accrued interest. Accrued interest is calculated assuming next-day settlement. Cash flows from bond payments that are received during the month are retained in the index until the end of the month and then are removed as part of the rebalancing. Cash does not earn any reinvestment income while it is held in the index. The index is rebalanced on the last calendar day of the month, based on information available up to and including the third business day before the last business day of the month.

No changes are made to constituent holdings other than on month end rebalancing dates. Inception date: August 31, 1986.

- **The Credit Suisse Western European Leveraged Loan Index (“CSWELLI”)** is designed to mirror the investable universe of the leveraged loan market of issues which are denominated in US\$ or Western European currencies. The issuer has assets located in or revenues derived from Western Europe, or the loan represents assets in Western Europe, such as a loan denominated in a Western European currency. Loan facilities must be rated “5B” or lower. That is, the highest Moody’s/S&P ratings are Baa1/BB+ or Ba1/BBB+. Only fully funded term loan facilities are included and the tenor must be at least one year. Minimum outstanding balance is \$100 million and new loans must be priced by a third-party vendor at month-end. The index inception is January 1998.
- **The BofA European Currency High Yield Constrained Index (“HP00”)** tracks the performance of EUR and GBP denominated below investment grade corporate debt publicly issued in the eurobond, sterling domestic or euro domestic markets. Qualifying securities must have a below investment grade rating (based on an average of Moody’s, S&P and Fitch) and an investment grade rated country of risk (based on an average of Moody’s, S&P and Fitch foreign currency long term sovereign debt ratings). In addition, qualifying securities must have at least one-year remaining term to final maturity, a fixed coupon schedule and a minimum amount outstanding of EUR 100 million or GBP 50 million. Original issue zero coupon bonds, "global" securities (debt issued simultaneously in the eurobond and domestic markets), 144a securities and pay-in-kind securities, including toggle notes, qualify for inclusion in the Index. Callable perpetual securities qualify provided they are at least one year from the first call date. Fixed-to-floating rate securities also qualify provided they are callable within the fixed rate period and are at least one year from the last call prior to the date the bond transitions from a fixed to a floating rate security. Defaulted, warrant-bearing and euro legacy currency securities are excluded from the Index. Inception date: December 31, 1997 The above rules take into account all revisions up to and including December 31, 2010.
